21	Number of households losing their crops and/or revenues	0
22	Total areas of farmlands lost (ha)	0
23	Estimation of agricultural revenue lost (USD)	0
24	Number of building to demolish totally	0
25	Number of building to demolish totally at 50%	0
26	Number of building to demolish totally at 25%	0
27	Number of tree-crops lost	0
28	Number of commercial kiosks to demolish	0
29	Number of ambulant/street sailors affected	0
30	Number of community-level service infrastructures disrupted or dismantled	0
31	Number of households whose livelihood restoration is at risk	0

EXECUTIVE SUMMARY

0.1 Overview of Project

The Resilient Rice Regional Value Chains in West Africa (REWARD) Project is being implemented by the Government of Ghana through the Ministry of Food and Agriculture (MoFA) with funding from the African Development Bank (AfDB). The REWARD project aims to boost the production of rice, as it is an important crop in the economy of Ghana.

Over the years, there has been a significant increase in rice consumption due to population growth, urbanization and change in consumer taste and preference. Despite the increases in consumption, domestic production has lagged with an average deficit of about 0.67 million MT of consumption between 2008 and 2022 which has been filled by imports.

The local production of milled rice has consistently fallen short of consumption, with the shortfall being filled by imports. The national target is to attain self-sufficiency in 2028 with a total paddy production of 3.31 million MT.

The goal of the REWARD project is to set the country unto the path of sustainable local rice production focusing on rice, value chains in the Northern, North East, Upper East, Savannah and Upper West Regions of Ghana.

The Project has four (4) main components namely; production and productivity, processing and marketing, policy and governance, and project coordination and management. The overall rationale of the components of the REWARD-Ghana project is to reduce importation of rice by increasing competitive local rice production, processing, income, and job creation, which will lead to improved nutrition and food security in a sustainable manner and contribute to reducing poverty through a private-public sector driven interventions along the rice value chain. The specific objectives of the project are;

- To increase rice productivity and production thus increased incomes for farmers, particularly women and young people;
- To increase the resilience and adaptive capacities of rice farms and production systems; and
- To increase the marketing and intra-regional trade of rice.

Details of the project component is captured in Table below.

No	Component Name	Sub-Component and Activities
1	Production and Productivity	<u>Sub-component 1.1: Sustainable climate-resilient infrastructure and management services in rice production systems</u> Key interventions will include: • Development of Agricultural Zones • Sustainable Land and Water Management (SLWM) • Form and build capacity of Water Users Association • Social infrastructure development

No	Component Name	Sub-Component and Activities
		<u>Sub-component 1.2: Improved availability and access to climate-resilient inputs, mechanization services and knowledge</u> Key interventions will include: • Seed Delivery Systems • Fertilizers and Pest Control Management Systems • Agricultural Mechanization Services Delivery • Extension Delivery
2	Processing and Marketing	<u>Sub-component 2.1: Modernized processing infrastructure and strengthening capacities of value chain actors</u> This component will focus on: • The construction and installation of processing and storage infrastructure to minimise post-harvest losses and enhance value addition. • Development of information systems using innovative technologies (incl. digital) and consumer-oriented branding to improve access to market.
3	Policy and Governance	Key activities under this component will include: • Support to policy reforms and harmonization at regional/national levels • Finalize the National Rice Development Strategy II (NRDS) in line with PFJ 2.0. • Organise policy dialogues and workshops to discuss issues relevant to the rice sub-sector. • Coordinate activities to ensure synergies among rice value chain stakeholders and projects to boost production, processing, marketing and consumption of locally-produced rice. • Enhance control and regulations for agricultural inputs at regional/national levels.
4	Programme Coordination and Management	This component will be responsible for: • Day-to-day management of project activities to ensure harmony and coherence. • Establishment or nesting of Project Implementation Unit (PIU) under existing PIU to support the coordination and management of the project. • Development of Regional and National Management and monitoring systems based on digital technologies to ensure tracking of results at Regional and National levels, and in line with ECOWAS Rice Observatory (ERO).

Within the Municipality, the project will not be accessing land directly as land have been donated for the project by the Chiefs of Ko and Kpee communities who owns the land. There are 39 farmers who attain livelihood from the proposed project site and will have to move out to make way for the project. As such, these farmers will be economically displaced. However, alternative land has been provided to the PAPs by the Chiefs for uninterrupted farming activity.

The project activities that will occasion economic displacement is land preparation and installation of farm infrastructure. This is the stage of the project implementation where the vegetation will be

cleared using suitable machinery for land development to ensure that top soils are not unduly disturbed. Some activities to be undertaken will involve land levelling and In-field bunding. Bunds which are earthen embankments will be created to retain rainfall runoff. The plots will be formed to conform to the direction of the contours, in this way reducing the earth movement during bunding and levelling to the minimum. The levels of the plots will be set to balance cut and fill. Bunding and land levelling will form the major activities in plot formation. Pegging out of plots boundaries to the standard size of plots will be required during the levelling. All levelled plots would be portioned and banded by in-field contour bunds into plots.

Roads linking valleys to communities which are mostly in deplorable states will be maintained to reduce post-harvest losses which has been a major problem confronting farmers. Access roads will be maintained to permit the use of agricultural machinery in the cropping zone to do tillage, deliver inputs and send out produce.

Agriculture is the major livelihood activity in the project area which has the potential of positively transforming the lives of the people as there is vast arable land in the area which is predominantly undeveloped. The area has a longer one rainfall season from May to October each year and presents an opportunity for extensive agricultural production. The main risk to agriculture in the area is the phenomenon of climate change which makes agricultural livelihoods vulnerable to environmental challenges. The vulnerabilities relate to irregular rainfall, low yields, reduced soil fertility, incidences of pest and diseases infestation and flooding etc. ultimately impacting on livelihoods and incomes of the people.

Within the project communities (Ko and Kpee) and its surrounding communities, land is mostly under the control of traditional authorities and family elders (skin land). The Chief together with the elders and land priests (custodians), manage land on behalf of the communities. Individuals or groups do not usually have absolute ownership but rather usufruct rights (right to use the land).

Access to land for any development by any interested person is done through the traditional authorities where allocations are made after the necessary consultation and laid down procedure followed. A prospective user makes a request through the Chiefs elders or family head. Terms are then discussed which could involve token payments (drinks, cola, money, or livestock), which symbolize respect and commitment. If approved, the land is allocated, and the community witnesses the process to prevent disputes. There is no conflict in the project community and the valley area as well as surrounding communities attributed to land. Land for agricultural and other development undertakings are available.

0.1.1 Objectives of the Resettlement Action Plan

The objectives of the RAP include:

1. Provide an understanding of what impact sub-projects will have on persons living and operating in the project area;
2. Propose changes that aim at avoiding or minimizing livelihood disruption and involuntary resettlement impacts;
3. Ensure that impacts are properly assessed and all Project-affected-persons (PAPs) are identified and their assets that are affected are recorded and valued for adequate compensation;

4. Identified PAPs and valued affected assets, are provided with adequate compensation packages whether in cash or kind based on the extent of displacement;
5. Record grievances, and provide support for resolution of grievances; and
6. Ensure stakeholders including PAPs have been identified and engaged to ensure issues of concern to them are adequately addressed.

0.2 Project Applicable RAP Issue

The RAP issue to be occasioned as a result of the implementation of the REWARD Project in the Ko and Kpee valleys is economic displacement. Economic displacement refers to the loss of income sources or means of livelihood resulting from land acquisition or land use change. This impact will arise as a result of the relocation of farmers on the project site. Even though the farmers will be beneficiaries of the project, they will have to move during land preparation for the project. As a result, they will have to undertake farming elsewhere. The Chiefs of Nandom Kpee and Ko have provided vast lands to the affected farmers to use for crop cultivation and as pasture for livestock.

Assessment of the project impact on the communities revealed that a total of 39 farmers made up of 38 males and 1 female will be economically displaced. At the time of the assessment, there were no crops under cultivation or grazing on the project site as it was in the dry season when farming activities are not undertaken due to rainfed agriculture been practiced in the project area.

The land requirement for the project in both Ko and Kpee Valleys is 350 hectares. This will be developed for use by the beneficiary farmers. The PAPs who undertake farming activities on sections of the valley earmarked for development will be restricted in terms of access to the land during the preparation phase of the project where construction activities will be undertaken to prepare the land and install some infrastructure.

The ages of the PAPs ranged from 26 to 76 years, with an average age of approximately 46.6 years. The majority (64%) of the PAPs were in the 31-50 years age category with the least (5%) in the 18-30 years group. On education, A significant proportion (44%) of the PAPs, have no formal education with only 38% having completed Primary school and Senior High School and 10% with Tertiary level educational background.

Socioeconomic activities centered on crop farming constitutes the primary source of income for the vast majority of PAPs (80%). Other notable primary income sources include; construction works and livestock rearing. Domestic livestock rearing was the most recorded secondary income of source reported by majority of the PAPs (54%). Other secondary income sources are farming and artisanship.

On income from the sale of rice produce, a significant number of the Project Affected Persons (93%) reported an annual income of GHS 2,000.00 or less. This shows that even though the amount realized from the sale of rice is low and nothing to write home about, rice production nevertheless offers economic opportunity to the people for which the right incentives must be provided to boost production which will better incomes in the long run.

Basic household necessities dominate the expenditure item areas of PAPs. Food, education, and health constituted the primary areas of expenditure for nearly all PAPs, indicating the importance of these to households maintenance.

On vulnerability, the PAPs vulnerability status is diverse. Low Income, Large Household Size, Female Headed Households and Old Age constituted the vulnerability status of the Project Affected Persons. Low income is however the widespread form of vulnerability among the PAPs.

The implementation of the project will impact positively on the socio-economic lives of the PAPs. The project beneficiaries including the PAPs will have access to bigger lots, prepared farmlands, improved rice seedlings, extension support services and farm infrastructure among others. This support will significantly improve rice yields and result in higher income for the farmers. The beneficiaries will earn much higher income from rice sales compared to what they currently earn. The farmers could use the income to invest in other agricultural crop farming activities to improve general income from agriculture which is the primary economic activities of the PAPs and project beneficiary communities. With improved incomes, the households of the PAPs and beneficiary farmers will be in a better position to cater for household necessities such as food, health, and education etc. Overall, the project will significantly enhance the social and economic lives of the PAPs and other beneficiaries.

On the effects of temporary loss of farmland, alternative farmlands have been provided for the PAPs to cater for restrictions on the project valley land during land preparation and infrastructure installations. Due to the alternative land allocation, the expected impact on livelihoods and income is assessed to be minor as the PAPs are not going to be denied farming opportunities.

0.3 Legislative framework

This RAP outlines the framework and principles for execution of the Project compensation and livelihood related issues for project affected persons as early as possible in project development. This is in accordance with the requirements of the African Development Bank (AfDB) Operational Safeguard (OS 5) on - Land acquisition, Restriction on Access to Land and Land Use and Involuntary resettlement, IFC PS 5 on Land Acquisition and Involuntary Resettlement and national legislations including:

- The Constitution of the Republic of Ghana, 1992
- Ghana's National Land Policy, 1999
- The State Lands Act 1962, (Act 125) and the State Lands (Amendment) Act, 2000 (Act 586)
- The Land Act, 2020 (Act 1036)
- Land Use and Spatial Planning Act, 2016 (Act 925)
- The Office of the Administrator of Stool Lands Act, 1994 (Act 481)
- The Administration of Lands Act, 1962 (Act 123)
- The Lands Commission Act, 2008 (Act 767)
- Local Governance Act, 2016 (Act 936)
- Alternative Dispute Resolution Act 2010 (Act 798)

The REWARD project is designed such that beneficiary communities through their Chiefs and individuals donate land for the project. The donation is sealed officially through the Voluntary

Land Donation Agreement Form where the donating party(ies) sign the form detailing the hectares of land donated and the location. Therefore, the project will not acquire lands and there will not be any such undertaking as land expropriation (compulsory acquisition).

In Ghana, the compulsory acquisition of land by the State is guided by the 1992 Constitution (Article 20), the State Lands Act, 1962 (Act 125) (as amended), and the Land Act, 2020 (Act 1036). The President issues an Executive Instrument (E.I.), declaring the acquisition of the land for public use. This notice is published in the Gazette and often in the media to inform affected persons. Once the E.I. is published, ownership of the land vests in the State. The Lands Commission, together with other relevant state agencies, formally notifies affected landowners and occupiers. Valuation exercises are then conducted by the Lands Valuation Division (LVD) of the Lands Commission and appropriate compensation to affected land owners are determined and paid. The process is meant to ensure fairness, transparency, and protection of citizens' rights.

This process, however, is not applicable to the project as land have already been acquired from voluntary donors from the project communities.

0.3.1 Institutional Arrangement

The institutional arrangement in terms of responsibilities and monitoring implementation of the RAP is provided in the Table below.

No.	Institution	Role/Responsibility Description
1.	AfDB	• Maintains an oversight role to ensure compliance with the bank's safeguards policies, review and provide clearance and approval for the RAPs. • Will carry out external supervision for satisfactory RAP implementation and provide support role throughout project implementation and monitor progress of project implementation. • Will recommend additional measures for strengthening institutional capacity building measures as appropriate and implementation performance.
2.	MoFA/ REWARD PCU	• Responsible for the successful implementation of the project by engaging appropriate contractors and consultants for the execution of the project. • Has the oversight responsibility for the implementation of the RAP. • Responsible for providing funds for the purchase of bicycles to eligible PAPs who will be economically/physically displaced. • Responsible for honouring compensation to PAPs. • Have a representation in the RAP Management Teams including the Grievance Committee and the Monitoring and Evaluation Committee. • Responsible for ensuring that environmental and social safeguard issues and documentations are taken care of under all the Project.
3.	RAP Consultant	• Responsible for the preparation of the RAP and Communication and Outreach Plan.

No.	Institution	Role/Responsibility Description
		- Responsible for ensuring that impacts are properly assessed and all PAPs are identified and their affected assets recorded and valued for adequate compensation. - Responsible for ensuring that stakeholders including PAPs have been identified and engaged to ensure issues of concern to them are adequately addressed. - Responsible for consultations with the PAPs and providing feedback on project/RAP implementation to the PAPs and MoFA. - Responsible for ensuring that all grievances are resolved, and feedback provided to the PAPs concerned.
4.	Nandom Municipal Assembly	Beneficiary local government authority where the project is being implemented. Will be directly involved with the RAP implementation and will have representations in the Grievance Committee and Monitoring and Evaluation Committee.
5.	PAPs	The PAPs will be required to select representatives to the grievance committee at the Assembly/Sub-metro level. These representatives will be directly involved in activities of the Grievance Redress Mechanism (GRM) and serve as liaisons for all identified PAP groups.

0.4 Baseline

The Nandom municipality, according to the 2021 Population and Housing Census, has a total population of 51,328 comprising 25,577 (49%) males and 25,751 (51%) females. This is about 5.7% and 0.2% of the regional and national population respectively. The population density is 132.8 persons per sqkm with a total of 9,864 households and a household size of 5.0 persons per household which is lower than the regional average of 5.2. The municipality has a very youthful population with about 90% below 60, according to the 2021 Population and Housing Census.

The Dagaabas are the predominant ethnic group with other minor tribes such as the Hausa, Mossi, Sissala, Asante etc. Unlike other parts of Northern Ghana, the population of Christians is above the Islam population in the municipality. There are three main religious groups namely, Christianity (36%), Islam (32%) and Traditional (29%) in that order in the municipality.

The economic base of the Municipality is agriculture. Most (78%) of the economically active population are engaged in the agricultural sector, forestry and fishery work, 10% in craft and related trade and 4% in service and sales. About 5% are engaged as managers, professionals, and technicians. Considering that farming is the people's main occupation, it implies that their main sources of livelihood and income are limited during the dry season, resulting in the migration of the youth to the south in search of greener pastures. As a result, adequate irrigation facilities are required to promote and enhance agricultural activities during the dry season.

Land ownership in the Municipality follows a patrilineal system with regards to land inheritance. Accordingly, inheritances can go to the male's sons or brothers. Dagaabas are the land custodians,

and according to the customs that have been passed down, women are barred from land ownership and entitlements, which are mostly acquired through inheritance.

Land ownership in traditional society tends to be acknowledged by communal recognition and observation, or that of the ruling traditional elder. Deeds or papers are not usually involved, nor are lawyers. The existence of deeds or papers usually indicates a previous dispute over the land which was taken to the court system. When a conflict emerges the traditional avenue for resolution is to have the traditional elder arbitrate. However, this process usually only works when both parties respect the traditional elder. If one or both parties lack confidence in the traditional elder, local politicians are frequently asked to arbitrate.

The project is not designed to acquire lands for project implementation, as such lands have been voluntarily donated by the Chiefs who owns the land in the project communities.

Rainfall dependent farming constitutes the primary source of income for majority of PAPs (80%) and their households thereby making livelihoods vulnerable for a significant number due to climatic variations. Out of the 39 PAPs identified, 36 (92%) are vulnerable. The PAPs fall within four vulnerability criteria namely; low income, female headed household, large household size, and old age.

0.5 Compensation Plan

The eligibility criteria applied in the identification and confirmation of Project Affected Persons was that, a PAP should be someone who engaged in farming on the affected land (project valley) as a source of livelihood as well as a person who owns a structure either movable or immovable on the valley. The assessment revealed that there was no structure identified and the compensation applies only to those who engaged in farming on the valley.

The type of compensation planned for the PAPs after evaluation of the project impact are; in-kind replacement of productive land to protect livelihoods and transportation assistance to PAPs to facilitate movement to alternative land for the continuation of farming activities. This plan will help to cushion the PAPs in order to safeguard their livelihoods. Cut-off date beyond which compensation will not be paid in respect of encroachment on the project valley was 30th May, 2025. This is provided in the Table below.

No.	Category of Impact	Description of compensation and assistance	Remarks
1.	Complete/permanent loss of property or use right.	Compensation not applicable.	No land will be acquired by the project, as a result, no physical relocation cost is applicable

No.	Category of Impact	Description of compensation and assistance	Remarks
2.	Temporary economic displacement (those who farm in the valley will lose income during land preparation period if it goes beyond the dry season earmarked for the land preparation works).	Alternative land for farming has been secured for the farmers. They are expected to continue farming activities at the alternative site.	Compensation in respect of economic displacement for the period of construction (land preparation). Identified alternative land is available to be used for farming and as pasture by PAPs.
3.	Temporal disturbance	Disturbance caused by change of farming site.	In place of direct cash compensation, bicycles with a carrier will be provided to all PAPs to facilitate transport to the new site. Bicycles are widely used by men and women to and from the farm and for other household activities.

Payment of compensation to PAPs (Transportation assistance - Bicycle)) will be done before commencement of construction works at the project valley. In respect of alternative land for the PAPs to continue farming activities, this has been provided by the traditional authorities to the PAPs.

Compensation Summary Sheet of PAPs is presented in the Table below.

Summary Sheet of PAPs

Code PAP*	First and last names of the PAP	Sex (M, F)	Age	Picture of ID (Ghana card, NHIS, Voter card)	Profession and principal activity of PAP	Tel. of the PAP and/or representative	PAP's Picture	Image of the affected property/ies	Size of farmland (acres)	GPS coordinates of the affected property/ies	Real compensation cost in local currency & dollars	Witness/Neighbor of the PAP (Names and Tel.)

0.6 Arbitration/Grievance Redress Mechanism

A Grievance Redress Mechanism (GRM) has been established to ensure effective resolution of complaints related to the project's environmental and social impacts, including voluntary land donation, restrictions on land access and land tenure issues, labour issues, and community health and safety. The objective of the Grievance Redress Mechanism (GRM) is to provide an effective, transparent and timely system that would give aggrieved persons redress and avoid litigation, minimize bad publicity, avoid/minimize delays in execution of the project, and ensure sustainability of the Project. The GRM will provide all persons and groups affected by the project activities with avenues through which they can express their concerns and receive the needed corrective actions in an appropriate and timely manner.

The GRM follows a three-tier structure: community-level mechanisms (Grievance Redress Committee and site-level processes), district-level committees, and a project-wide grievance redress committee. This structure allows for the escalation and resolution of grievances at appropriate levels throughout the project's implementation.

Serious offenses such as sexual harassment, violence, corruption, and fraud which are criminal under Ghanaian law and are unacceptable in society will be referred to the appropriate state institutions, while also allowing complainants to bypass the internal grievance system if they prefer. GBV/SEA/SH cases will be handled through a confidential referral protocol, ensuring survivor-centred resolution. Preventive measures against grievances include staff sensitization and health awareness campaigns, with grievance management primarily led by the Social Safeguard Specialist, with support from other project officers. GRM activities will be fully funded by the REWARD project, except when cases are taken to court beyond the project's internal mechanisms.

The project's Grievance Redress Mechanism will be handling potential Voluntary Land Donation issues as well as compensation for economic displacement issues. The GRM role in addressing potential Voluntary Land Donation issues will be to ensure that it provides a channel for landowners to voice concerns they may have. It will also ensure that grievances about documentation (e.g., disputes over land boundaries etc.) are reviewed and corrected as well as provide a fair, accessible, and timely process to resolve disputes over ownership, consent, or use rights related to donated land.

In terms of potential disputes relating to the payment of compensation for economic displacement, the GRM will provide avenues for affected persons to challenge or appeal the adequacy or fairness of compensation package to ensure that compensation matches what has been agreed with PAPs. The GRM will also endeavour to build trust between project implementers and affected communities by ensuring concerns are addressed transparently and fairly.

0.7 Monitoring/Evaluation and Reporting

Regular monitoring and reporting are central to, and required for, effective management and implementation of the resettlement process. Resettlement monitoring and evaluation will focus mainly on the implementation of resettlement (i.e., compensation for displacement).

The RAP monitoring will have two components, and these include:

- ◆ Process monitoring (internal) - will focus on compliance with the Resettlement Action Plan (RAP) and the updated stakeholder engagement, communication and outreach plan and to ensure that the objectives of these reports have been achieved. The monitoring indicators will include but not limited to:
 - ✓ Number of PAPs available and received or signed for the compensation;
 - ✓ Number of Representatives of PAPs who received compensation on behalf of PAPs;
 - ✓ Date of compensation presentation, and recipient of the compensations;
 - ✓ Number of grievances registered, number of grievances resolved and unresolved complaints; and
 - ✓ Number of complaints resolved at the project site level, resolved by MoFA, resolved by the Grievance Committee, and number sent to the law courts.
- ◆ Independent performance monitoring (external) - will be carried out by an external party (e.g., AfDB) at structured intervals, e.g., mid-term monitoring and completion evaluation/audit. The completion evaluation/ audit is to determine whether the objectives of the RAP have been achieved or otherwise and that compensation has been successfully completed in compliance with the RAP. The completion evaluation/ audit would be undertaken after completion of compensation payment prior to construction activities including reinstatement works and submission of closeout report by the RAP consultant.

The RAP Consultant will prepare and submit monthly and quarterly reports and a close-out report.

- Monthly Reports during construction will provide account for all activities carried out within the specified month including challenges encountered.
- Quarterly Progress Report during construction will provide status of all activities carried out in the specified quarter including challenges and recommendations.
- RAP Closeout Report will provide a close out report on all resettlement and community engagement planning and implementation activities among others as provided in the ToR.

Dissemination of periodic reports and completion audit on the RAP implementation to all project partners will be fully adhered to by REWARD. Monitoring of activities to ensure that what is contained in the RAP is been followed and for successful RAP implementation will be undertaken by a number of key institutions directly involved in the project. The institutions and their role in the monitoring of the RAP implementation is provided in the Table below.

No.	Monitoring Institution	Role/Responsibility
1.	AfDB	• Maintains an oversight role to ensure compliance with the bank's safeguards policies are followed in the implementation of the RAP. • To determine whether the objectives of the RAP have been achieved or otherwise. • To determine if compensation has been successfully completed in compliance with the RAP.

No.	Monitoring Institution	Role/Responsibility
2.	MoFA/REWARD	- Ensure compliance with the principles of the RAP and that actions and commitments described RAP are being implemented. - Ensure that eligible people to be affected by the project receive their compensation promptly. - Ensure that complaints and grievances lodged by PAPs are followed-up and resolved. - Ensure that the contractors do not destroy properties beyond or above what has been compensated for or valued for compensation. - Provide MoFA with feedback on the resettlement/compensation implementation programme.
3.	Nandom Municipal Assembly	- Provide support to MoFA/REWARD for overall RAP implementation. - Provide support to MoFA/REWARD in the resolution of project related complaints by PAPs and follow-up on the issues.

0.8 RAP Implementation Plan

The implementation plan provides for indicative timelines for implementation of the RAP as outlined below.

Main tasks	Specific tasks	Timelines/ Period	Comments
Stakeholder engagement	Meetings with stakeholders i.e. one-on-one, key informant interviews, focus group discussions	April to May 2025	Completed
Preparation of draft RAP	Census of affected persons	April to May 2025	Completed but monitoring required
	Socio-economic survey of PAPs	April to June 2025	Completed but monitoring required
	Field assessment of impact categories and reporting	June to July 2025	Completed
	Writing of draft RAP report in line with the ToR for the assignment	August 2025	Completed
Revision and Finalization of draft Report	Review of draft RAP	September 2025	-
	Revised RAP preparation	September 2025	-
	Finalization of RAP	September 2025	-
	Approval and clearance of RAP	October 2025	-

Main tasks	Specific tasks	Timelines/ Period	Comments
Disclosure of Report	Disclose RAP at Nandom Municipal Assembly and on AfDB website	November 2025	-
	Disclosure of compensation proposal/ figures to PAPs	November 2025	-
Formation of Grievance Committee	Grievance Committee	December 2025	
Compensation payment	Compensation disbursement to PAPs	January 2026	To be paid prior to commencement of project activity
Grievance Redress	Resolution of all disputes/ complaints	Project duration	-
Internal Monitoring and Evaluation	Monitor implementation of resettlement/ compensation activities	Project duration.	-
Reporting	Prepare Quarterly Progress Report	Every quarter during construction period	-
	Prepare RAP Closeout Report before commencement of works	One (1) month before construction phase activities commence	-

0.9 RAP Implementation Budget

The cost estimates for the implementation of the RAP including direct compensation payments in the form of bicycle to PAPs, and contingency issues is **Gh¢ 104,770.00 / USD 9,940.23**). The details are presented in the Table below.

No.	Item	Estimated Cost/ Gh¢ / USD	Remarks	Source of funds
1	Compensation to PAPs (Bicycles)	50,700.00	Amount to purchase bicycles for PAPs to facilitate transportation to alternative farming area. To be provided and bicycles purchased by MoFA	Project funds
2	Subtotal	50,700.00 USD 4,810.25		
3	Audit of RAP completion	10,000.00	Evaluation of RAP implementation	Project funds
4	Cost for complaints redress	31,000.00	Cost of grievance redress	Project funds

No.	Item	Estimated Cost/ Ghc / USD	Remarks	Source of funds
5	Information and awareness campaign	8,0000	Required for publicity and awareness creation including disclosure	Project funds
6	Subtotal	49,000.00 USD 4,648.96		
7	Contingency (10% of No.2)	5,070.00	For unforeseen contingencies and incidental costs. To be provided by MoFA	Project funds
8	Total for RAP Implementation	104,770.00 USD 9,940.23	Estimated cost for the implementation of the RAP for Ko and Kpee Rice Valleys	Project funds

0.10 Conclusion

This RAP covers 39 persons including 38 males and 1 female whose primary livelihood activity of crop farming on the project site will be affected by the REWARD project implementation by way of livelihood disruption and economic displacement. Compensation will be provided in the form of bicycles, to be purchased from project funds to the project affected persons from an estimated budget (**Ghc 104,770.00 / USD 9,940.23**) to facilitate transportation of PAPs to the alternative land allocated for farming by the Chiefs which is about 3-6 km away from the project communities. Also, concerns of PAPs, community members or any other persons will be adequately addressed by the Grievance Redress Mechanism proposed in this report. Sufficient provisions have been made for PAPs to receive their compensation and any necessary assistance.

1.0 INTRODUCTION

The Resilient Rice Regional Value Chains in West Africa (REWARD) Project is being implemented by the Government of Ghana through the Ministry of Food and Agriculture (MoFA) with funding from the African Development Bank (AfDB). The REWARD project aims to boost the production of rice, as it is an important crop in the economy of Ghana.

Over the years, there has been a significant increase in rice consumption due to population growth, urbanization and change in consumer taste and preference. Despite the increases in consumption, domestic production has lagged with an average deficit of about 0.67 million MT of consumption between 2008 and 2022 which has been filled by imports.

In 2022, the total national consumption of milled rice was estimated at 1.44 million MT with a per capita consumption of about 43.5kg per annum as compared to 0.55 million MT in 2008 with per capita consumption of 22.6kg per annum. Domestic paddy rice production in 2022 was estimated at 1.28 million MT on an area of 382,000 ha yielding 0.68 million MT of milled rice. Paddy rice production in 2008 stood at 0.30 million MT on an area of 133,000 ha. The increase in production from 2008 to 2022 was largely due to about 187% increase in the area under cultivation and minor yield increases.

The local production of milled rice has consistently fallen short of consumption, with the shortfall being filled by imports. The national target is to attain self-sufficiency in 2028 with a total paddy production of 3.31 million MT.

Despite the progress made in the rice sub-sector, there are still a number of challenges that need to be addressed to accelerate growth through further productivity gains, area expansion, and value addition. These challenges include low technical and managerial capacity, limited irrigation infrastructure, inadequate financing, and lack of an enabling policy environment. These challenges have been grouped into production and post-production.

Production Challenges:

- ❖ High Cost of Land Development
- ❖ Inadequate Irrigation and Poor Water Management
- ❖ Limited availability of quality breeder, foundation and certified seeds
- ❖ Inadequate use of Improved Agro Inputs
- ❖ Inadequate access to mechanized services
- ❖ Poor knowledge of good agronomic practices

Post-production Challenges:

- ❖ Poor quality of processing and storage facilities

It is expected that the MoFA REWARD Project will effectively deal with these production challenges and set the country unto the path of sustainable local rice production focusing on rice, value chains in the Northern, North East, Upper East, Savannah and Upper West Regions of Ghana.

1.1 Description of the Subproject

The Project has four (4) main components namely; production and productivity, processing and marketing, policy and governance, and project coordination and management. The overall rationale of the components of the REWARD-Ghana project is to reduce importation of rice by increasing competitive local rice production, processing, income, and job creation, which will lead to improved nutrition and food security in a sustainable manner and contribute to reducing poverty through a private-public sector driven interventions along the rice value chain. The specific objectives of the project are;

- To increase rice productivity and production thus increased incomes for farmers, particularly women and young people;
- To increase the resilience and adaptive capacities of rice farms and production systems; and
- To increase the marketing and intra-regional trade of rice.

Details of the project component is captured in **Table 1-1** below.

Table 1-1: Components of the Project

No	Component Name	Sub-Component and Activities
1	Production and Productivity	<u>Sub-component 1.1: Sustainable climate-resilient infrastructure and management services in rice production systems</u> Key interventions will include: • Development of Agricultural Zones • Sustainable Land and Water Management (SLWM) • Form and build capacity of Water Users Association • Social infrastructure development
		<u>Sub-component 1.2: Improved availability and access to climate-resilient inputs, mechanization services and knowledge</u> Key interventions will include: • Seed Delivery Systems • Fertilizers and Pest Control Management Systems • Agricultural Mechanization Services Delivery • Extension Delivery
2	Processing and Marketing	<u>Sub-component 2.1: Modernized processing infrastructure and strengthening capacities of value chain actors</u> This component will focus on: • The construction and installation of processing and storage infrastructure to minimise post-harvest losses and enhance value addition. • Development of information systems using innovative technologies (incl. digital) and consumer-oriented branding to improve access to market.

No	Component Name	Sub-Component and Activities
3	Policy and Governance	Key activities under this component will include: • Support to policy reforms and harmonization at regional/national levels • Finalize the National Rice Development Strategy II (NRDS) in line with PFJ 2.0. • Organise policy dialogues and workshops to discuss issues relevant to the rice sub-sector. • Coordinate activities to ensure synergies among rice value chain stakeholders and projects to boost production, processing, marketing and consumption of locally-produced rice. • Enhance control and regulations for agricultural inputs at regional/national levels.
4	Programme Coordination and Management	This component will be responsible for: • Day-to-day management of project activities to ensure harmony and coherence. • Establishment or nesting of Project Implementation Unit (PIU) under existing PIU to support the coordination and management of the project. • Development of Regional and National Management and monitoring systems based on digital technologies to ensure tracking of results at Regional and National levels, and in line with ECOWAS Rice Observatory (ERO).

The proposed Project will be implemented in seven (7) Districts within four (4) administrative regions thus Northern, Upper West, Savannah and North-East Regions, as indicated in the Table below. The valleys will be upgraded with necessary infrastructure, such as water conservation bunds and drains, drying patios and farm access tracks.

No	Region	District	Community	Valleys	Area (ha)	Project Activities
1	Northern	Mion	Tindantua	Sakoya, Bogni	350	New land development with machinery support, drying patios, farm roads etc.
2		Tamale Metro	Nyankpala	SARI	50	Construct bunds and drains of existing area for SARI for seed production
3		Savelugu	Nakpanzoo	Nakpanzoo	300	Rehabilitation of existing valley, reshaped bunds and spot improvement of farm tracks
4	North East	Mamprugu Moagduri	Kubori/ Zanwara	Kubori	250	Land development packaged (bunds, drying patios and site office)
5	Upper West	Nandom	Nandom-Kpee	-	200	Machinery support with drying patios and land development

No	Region	District	Community	Valleys	Area (ha)	Project Activities
			Ko	Gbañin	150	Machinery support with drying patios and land development
6		Wa Municipal	Charia	Kolivege Bor	350	Land development with drying patios inclusive
			Sing	-	200	Reshaping of bunds, drying patios and drainage construction to convey excess water out of the fields
7	Savannah	West Gonja	Busunu	-	200	Land development and bunds
	TOTAL				2,050	-

1.2 Scope of Displacement and Involuntary Resettlement

The project will not acquire lands as the project is designed such that communities through chiefs and individuals donate land for the project for the benefit of the communities. In the case of Nandom Kpee and Ko valleys in the Nandom Municipality, the Chiefs of the communities who owns the land, have donated required land for the project, therefore there would not be land acquisition. However, project activities such as land clearing and levelling could restrict locals access to the land that was otherwise used as farmlands and as pasture area for animals which are key economic activities. The impact is local, and the displacement will be temporary as alternative land is available for the affected farmers through the Chiefs. The impact is therefore considered moderately significant as the identification and proposal of alternative farmland and pasture areas to locals who otherwise used the project site will help reduce the impact of restricted access during land preparation period.

An assessment of the beneficiary communities, from 15th April to 30th May, 2025, showed that 39 (38 males, 1 female) farmers (**Annex 7**) who use the project site for farming will be affected by the project. There are no economic trees such as Shea and Dawadawa on the project site.

The project activities that will occasion economic displacement is land preparation, installation of farm infrastructure, and machinery support including drying patios. This is the stage of the project implementation where the vegetation will be cleared using suitable machinery for land development to ensure that top soils are not unduly disturbed. Some activities to be undertaken will involve land levelling and In-field bunding. Bunds which are earthen embankments will be created to retain rainfall runoff. The plots will be formed to conform to the direction of the contours, in this way reducing the earth movement during bunding and levelling to the minimum. The levels of the plots will be set to balance cut and fill. Bunding and land levelling will form the major activities in plot formation. Pegging out of plots boundaries to the standard size of plots will be required during the levelling. All levelled plots would be portioned and bundled by in-field contour bunds into plots.

Roads linking valleys to communities which are mostly in deplorable states will be maintained to reduce post-harvest losses which has been a major problem confronting farmers. Access roads will be maintained to permit the use of agricultural machinery in the cropping zone to do tillage, deliver inputs and send out produce.

1.3 Purpose and Objectives of the Resettlement Action Plan

The purpose of the assignment is to conduct studies to prepare a RAP for the proposed Resilient Rice Regional Value Chains in West Africa (Reward) Project in the Nandom Municipality of Ghana. The Project is committed to complying with national and the African Development Bank (AfDB) Operational Safeguard (OS) 5 on Land Acquisition, Restrictions on Access to Land and Land Use, and Involuntary Resettlement.

The RAP outlines the framework and principles for execution of the Project compensation/relocation/resettlement and livelihood related issues for project affected persons as early as possible in project development. This allows for early and effective disclosure to key stakeholders, and subsequent feedback and inputs. Despite the measures put in place to avoid livelihood displacement, a detailed resettlement Action Plan is required to mitigate any unforeseen eventualities.

The objectives of the assignment include the following:

1. Provide an understanding of what impact subprojects will have on persons living and operating in the project area.
2. Propose changes that aim at avoiding or minimizing livelihood disruption and involuntary resettlement impacts.
3. Ensure that impacts are properly assessed and all Project-affected-persons (PAPs) are identified and their assets that are affected are recorded and valued for adequate compensation.
4. Identified PAPs and valued affected assets, are provided with adequate compensation packages whether in cash or kind based on the extent of displacement.
5. Record grievances, and provide support for resolution of grievances.
6. Ensure stakeholders including PAPs have been identified and engaged to ensure issues of concern to them are adequately addressed.

2.0 PRINCIPLES, POLICIES, LEGAL AND INSTITUTIONAL FRAMEWORK

This section provides an overview of Ghanaian national policy, legal and regulatory framework, institutional mandates and international requirements related to acquisition of rights to land. It summarises the key national laws and policies that are relevant to project-related resettlement of structures and affected people.

2.1 Principles

The following principles based on AfDB's Operational Social Safeguards have been applied in developing this RAP:

1. Transparency: ensure that affected people are consulted and give their demonstrable acceptance to the RAP;
2. Displacement is done in the context of negotiated settlements with project affected people;
3. Implement a resettlement process based on the Bank's requirements;
4. Maintain standards of the Bank's Integrated Safeguards System (ISS) on Involuntary Resettlements;
5. Adherence to world's best practices regarding disclosure of information to the PAPs in line with free-prior- informed Consent (FPIC);
6. Process should be driven by consultation and participatory planning;
7. Compensate with replacement value and restore livelihoods, with minimum disturbance;
8. Design compensation framework, replacement assets and livelihoods restoration to ensure sustainable benefits; and
9. Provide modern replacement assets and enable community continuity in a way that they are not worse off than they were before relocation.

2.2 National Policies, Legal and Regulatory Requirements, Local Governance and Institutional Mandates

Applicable national policies, legal frameworks and institutional requirements are presented in the Table 2-1 below.

Table 2-1: National Policies and Regulatory Frameworks

No.	Policy Requirement	Applicability to Proposed Project
1.	<u>Ghana's National Land Policy, 1999</u> Ghana's Ministry of Lands and Forestry issued the National Land Policy in 1999. This policy provides the "framework and direction for dealing with the issues of land ownership, security of tenure, land use and development, and environmental conservation on a sustained basis" Policy guidelines include:	The implementation of the project will conform to this policy to ensure that if land is to be acquired, there will be adequate compensation paid to right owners.

	I. No interest in or right over any land belonging to an individual, family, clan, stool or skin can be compulsorily acquired without payment, in reasonable time, of fair and adequate compensation. II. Provided that payment of adequate compensation in reasonable time will be made, government may acquire land wherever and whenever appropriate to, among other things.... implement any rural or urban improvement programme.....provide social infrastructure.	
Legal and Regulatory Requirement		Applicability to Proposed Project
2.	<u>The Constitution of the Republic of Ghana, 1992</u> Article 20 of the Constitution of the Republic of Ghana (1992) concerns the protection from deprivation of property, and includes the following subsections: (2) Compulsory acquisition of property by the State shall only be made under a law which makes provision for: (a) The prompt payment of fair and adequate compensation; and (b) a right of access to the High Court by any person who has an interest in or right over the property whether direct or on appeal from any other authority, for the determination of his interest or right and amount of compensation to which he is entitled. (3) Where a compulsory acquisition or possession of land by the state ...involves displacement of any inhabitants, the State shall resettle the displaced inhabitants on suitable alternative land with due regard for their economic well-being and social and cultural values. (5) Any property compulsorily taken possession of or acquired in the public interest or for a public purpose shall be used only in the public interest or for the public purpose for which it was acquired.	This is the overarching legislative framework of Ghana. Articles 18 and 20 provides conditions for the acquisition of property for development and compensation payment. Every development in the country is enjoined to comply with this constitutional provision.
3.	<u>Land Use and Spatial Planning Act, 2016 (Act 925)</u> The Land Use and Spatial Planning Act, 2016 (Act 925) regulates land use through a decentralised planning system to ensure judicious use of land in order to improve quality of life, promote health and safety in respect of human settlements and generally provide for spatial aspects of socio-economic development and related matters.	LUSPA is responsible for national spatial planning and collaborates with MMDAs for local planning for the sustainable utilisation of land resources for development. The project will ensure that land for the project is put to effective and sustainable use, so that more lands are not unnecessarily acquired for the project.

4.	<u>The State Lands Act 1962, (Act 125) and the State Lands (Amendment) Act, 2000 (Act 586)</u> This is the principal law under which lands can be compulsorily acquired in the public interest. The Act includes provision for the payment of compensation to those with a right or an interest in land acquired under the Act. The basis of the compensation includes the market value (also referred to as replacement value), and the cost of disturbance and damage. Community consultation and involvement during the resettlement process is not mandatory according to the Act.	The project will not involve compulsory land acquisition, however, in the event that land is acquired for the project, appropriate compensation will be paid to land owners and occupiers.
5.	<u>The Land Act, 2020 (Act 1036)</u> The Act's stated object is to ensure sustainable land administration and management, and effective and efficient land tenure and it seeks to achieve this by, inter alia, establishing a broad-based framework for registering land rights and interests, a customary land rights framework and enhancing transparency and accountability in land governance institutions. Section 253 makes provision for the assessment and payment of compensation to project affected persons.	All the procedures established for the acquisition of land for development projects by the State under this Act will be fully complied with, in respect of any land acquisition for the project.
6.	<u>The Office of the Administrator of Stool Lands Act, 1994 (Act 481)</u> This Act puts in place a mechanism to ensure equal distribution of the benefits accruing from stool land resources. Stool lands include those belonging to, or are controlled by, a stool or skin and have allodial title for the benefit of members of that stool / skin or for the benefit of members of that community.	The intent of the Act will be followed such that communities benefit from the acquisition of skin lands, if required.
7.	<u>The Administration of Lands Act, 1962 (Act 123)</u> This Act relates to the administration of stool and other lands. Section 10 of the Act provides that "the President may authorise the occupation and use of a land to which this Act applies for a purpose which, in the opinion of the President is conducive to the public welfare or the interests of the State". It is a requirement that a public notice shall be published in the Gazette giving particulars of the lands to be taken and the use to which it will be put. Persons whose interests are affected by "reason of disturbance as a result of an authorisation" are entitled to be compensated.	Fair compensation to right owners will be paid, should lands be acquired for the implementation of the project, even though that is not anticipated.
8.	<u>The Lands Commission Act, 2008 (Act 767)</u> The Lands Commission Act, 2008 integrates four public sector agencies responsible for managing land: the Survey and Mapping Division; the Land Registration Division; the Land Valuation Division; and the Public and Vested Lands Management Division. The Commission's functions include: (i) managing public land on behalf of the government; (ii) advising the government, local authorities and traditional authorities on the policy framework for the development of land in accordance with relevant development plans; (iii) formulating and submitting to the Government recommendations on national policy with respect to land use suitability or capability;	The project will be implemented in line with the objectives of the Commission for sustainable development of land resource.

	(iv) advising on, and assisting in the execution of, a comprehensive programme for the registration of title to land as well as registration of deeds and instruments affecting land throughout the country; (v) facilitating the acquisition of land on behalf of the Government; (vi) establishing standards to regulate survey and mapping of the country; (vii) undertaking land and land relative valuation services; and (viii) addressing protracted land boundary disputes, conflicts and litigations.	
9.	<u>Alternative Dispute Resolution Act 2010 (Act 798)</u> The purpose of the Act is to "...provide for the settlement of disputes by arbitration, mediation and customary arbitration, to establish an Alternative Dispute Resolution Centre and to provide for related matters." The Act further defines Alternative Dispute Resolution "as the collective description of methods of resolving disputes otherwise than through the normal trial process" (Section 135). The ADR Act covers both domestic and international arbitration in Ghana and the enforcement of both domestic and foreign arbitral awards within the jurisdiction.	Every form of effective dispute resolution mechanisms will be deployed to amicably resolve any form of dispute that may arise before and during the implementation of the project.
10.	<u>Local Governance Act, 2016 (Act 936)</u> The Regional Coordinating Council (RCC) and the Metropolitan /Municipal/District Assemblies (MMDAs) are responsible for the overall development of the region and metropolis/municipality/district respectively. Acts 936 and 480, which established the current district assembly structure, designate the District/Municipal/Metropolitan Assembly as the planning authority, charged with the overall development of the district.	The Act mandates local government bodies to take charge of planning and undertaking initiatives that promotes development.
Institutional Mandate		Applicability to Proposed Project
11.	<u>Lands Commission</u> The Lands Commission was established by Article 258 of the 1992 Constitution and the Lands Commission Act, 2008 (Act 767). The functions of the Lands Commission include amongst others; ▪ advise the Government, local authorities and traditional authorities on the policy framework for the development of particular areas of the country to ensure that the development of individual pieces of land is coordinated with the relevant development plan for the area concerned; ▪ ensure that through sound, sustainable land use planning, socio-economic activities are consistent with sound land use through sustainable land use planning in the long-term national development goals; and ▪ promote community participation and public awareness at all levels in sustainable land management and development practices to ensure the highest and best use of land.	The Commission is the entity charged with managing all public lands on behalf of the State. It also undertakes valuation of lands as well as validation of valuation conducted by independent valuers for the payment of compensations.
12.	<u>Environmental Protection Authority</u> The EPA is the body responsible for regulating the environment and ensuring the implementation of government policies on the environment. The Agency ensures that Environmental Impact Assessment is carried out for developments with potential adverse environmental impacts and mitigation measures instituted to respond to potential impacts. The functions of the Agency include:	The EPA is responsible for the issuance of environmental permit for projects, contingent upon the submission of required documents in

	- ensuring compliance with any laid down environmental impact assessment procedures in the planning and execution of development projects, including compliance in the respect of existing projects; - promoting effective planning in the management of the environment; - imposing and collecting environmental protection levies in accordance with the Environmental Protection Agency Act 1994, Act 490 or regulations made under the Act; and - acting in liaison and co-operation with government agencies, District Assemblies and other bodies and institutions to control pollution and generally protect the environment.	compliance with permitting regulations.
13.	<u>Ministry of Food and Agriculture</u> The Ministry of Food and Agriculture (MOFA) is the lead agency and focal point of the Government of Ghana, responsible for developing and executing policies and strategies for the agriculture sector within the context of a coordinated national socio-economic growth and development agenda. By means of a sector-wide approach, the Ministry's plans and programmes are developed, coordinated and implemented through policy and strategy frameworks. The vision of the Ministry is a modernised agriculture culminating in a structurally transformed economy and evident in food security, employment opportunities and reduced poverty.	MoFA is the entity responsible for the implementation of the REWARD project, including payment of any compensation to PAPs.
14.	<u>Local Government Authority</u> The Regional Coordinating Council (RCC) and the Metropolitan /Municipal/District Assemblies (MMDAs) are responsible for the overall development of the region and metropolis/municipality/district respectively. As the local planning entities, they are charged with charged with the overall development of the district. With regard to environmental management at the district level, the District Environmental Management Committees has been set up to among other things: Plan and recommend to the DA, strategies and activities for the improvement and protection of the environment with emphasis on fragile and sensitive areas, river courses etc.	The project will be implemented within the Nandom Municipality. The Municipal Assembly will therefore play a key role in the implementation of the project in respect of helping to handle issues such as grievance redress, amongst others.
15.	<u>Traditional Authorities</u> In Ghana, people of common descent owe allegiance to a symbol of collective authority, such as the "stool" for the Akans of southern Ghana or the "skin" for the northern people. Traditional authorities play a role in the administration of the area. At the village level, family and land disputes and development issues are also traditionally dealt with by the village chief and elders. In addition to providing an important leadership role, especially in the more rural areas, chiefs act as custodians of stool/skin land, can mobilise their people for developmental efforts and arbitrate in the resolution of local disputes. Although chiefs have no direct political authority, some are appointed by the Government on District Assemblies.	The project site is under a Traditional Authority, community leaders and key opinion leaders who must be consulted. There will be continuous engagement of all these key stakeholders for a successful execution of the project.

2.3 International standards

Applicable international standards relating to issues of land acquisition and involuntary resettlement are presented in the Table 2-2 below.

Table 2-2: International standards

No.	International Standard	Applicability to Proposed Project
1.	<u>African Development Bank Requirements</u> AfDB requirements are details in the Guidelines for Environmental and Social Considerations. The directives outline the following principles: • Involuntary resettlement should be avoided where feasible or minimized by exploring alternative project designs. If not feasible to avoid resettlement, resources are to be provided to enable the displaced persons to share in the project benefits; • The population to be affected by the project are those who may lose as the consequence of the project, all or part of their physical and nonphysical assets including homes, farms, productive land, properties, income earning opportunities, social and cultural relations and other losses that maybe identified in the process of resettlement; • All population impacted by the project should be consulted and given the opportunity to participate in planning and implementing resettlement programs; • All population affected by the project are entitled to be compensated for their lost assets and incomes at full replacement cost and assisted in their efforts to improve their livelihoods and standards of living to pre-project standards; • All affected population are equally eligible for compensation and rehabilitation assistance, irrespective of tenure status, social or economic standing and without and discrimination; • The AfDB policies stipulate that displacement or restriction of access to resources must not occur before necessary measures for resettlement are put in place. This includes provision of compensation and other assistance required for relocation prior to displacement to new sites with adequate facilities. For compensation purposes, preference should be given to land-based strategies for displaced persons whose livelihoods are land-based with land equivalent to the advantages of the land taken. If land is not available, options built around opportunities for employment should be provided in addition to cash compensation for land and other assets lost. In case of land-based livelihoods, cash payment maybe appropriate if the land taken is a small fraction of the affected asset and the residual is economically viable particularly, and the displaced persons have the opportunity to use such markets. Cash compensation should be sufficient to replace the lost land and other assets at full replacement cost in local markets. • In all cases, the displaced persons and host communities receiving them are to be provided with timely and relevant information, consulted on resettlement options	AfDB OS 5: Land Acquisition, Restrictions on Access to land and land use, and Involuntary Resettlement applies to the project. This OS applies to all Bank lending operations, both public and private sector. The project will comply with all requirements in respect of this operational safeguard in relation to; consultation, resettlement planning, compensation, and vulnerable groups etc.

No.	International Standard	Applicability to Proposed Project
	and offered opportunities to participate in planning, implementing and monitoring resettlement and appropriate mechanisms for grievance redress are established. It is also important that in resettlement sites or host communities, public services and infrastructure are provided and measures are to be taken to the extent possible to preserve the social and cultural institutions. Special measures are to be taken to protect socially and economically vulnerable groups and people living in extreme poverty.	
2.	<u>Operational Safeguards 10: Stakeholder Engagement and Information Disclosure</u> This OS recognizes the importance of open and transparent engagement between the Borrower and project stakeholders as an essential element of good international practice. Effective stakeholder engagement can improve the environmental and social (E&S) sustainability of projects, enhance project acceptance, and make a significant contribution to successful project design and implementation. OS10 applies to all of the Bank Group's funded operations. The Borrower shall engage with stakeholders throughout the project life cycle, commencing as early as possible in the project development process and in a time frame that enables meaningful consultations with stakeholders on project design and implementation.	All stakeholders relevant to the project will be continuously consulted throughout the entire project life span. Direct project affected persons will also be extensively engaged on proposed compensations and reach agreement on compensation payable to them.
3.	<u>Operational Safeguards 7: Vulnerable Groups</u> The OS7 contributes to poverty reduction and sustainable development by ensuring that projects supported by the Bank enhance opportunities for vulnerable groups to participate in, and benefit from, the development process in ways that do not threaten their unique cultural identities and well-being. This OS applies to vulnerable groups regardless of whether they are affected positively or negatively, and regardless of the significance of any such impacts. Through the requirements of this OS, the Bank encourages Borrowers to observe international human rights norms, standards, and best practices, and to reflect in Bank operations national commitments made under, inter alia, international human rights covenants and the African Charter of Human and Peoples' Rights. The Borrower is also enjoined to take necessary measures to appropriately manage the risks and adverse impacts of the project on vulnerable individuals and groups, including on women and girls, minorities and highly vulnerable rural minorities (HVRM).	There are vulnerable persons identified among the project affected persons whose socio-economic circumstances must be taken into key consideration in fashioning out compensation plan for PAPs. The project will make sure all project vulnerable persons are given the necessary consideration in compensation planning, so that

No.	International Standard	Applicability to Proposed Project
		their conditions are not worsened by the implementation of the project.
4.	<u>OECD Common Approaches</u> The Organization for Economic Cooperation and Development Recommendation of the Council on Common Approaches for Officially Supported Export Credits and Environmental and Social Due Diligence 2016 (the “OECD Common Approaches”) sets common approaches for undertaking environmental and social due diligence to identify, consider and address the potential environmental and social impacts and risks relating to applications for officially supported export credits by adherent organisations. They are applicable if an export credit agency that is an adherent to the OECD Common Approaches is involved in project financing. Of key relevance to managing Project-related resettlement, the OECD Common Approaches require that the project is reviewed against the IFC PS, including PS5 on involuntary resettlement.	The IFC PS 5 on involuntary resettlement which “OECD Common Approaches” subscribe to will be complied with in the event of any form of involuntary resettlement.

2.4 Gap analysis of national law and international standards

A gap analysis of the requirements for resettlement under national law compared to the applicable international standards, including the AfDB Involuntary Resettlement Policy requirements and the IFC PS 5, is provided in Table 2-3.

Table 2-3: Gap Analysis of the Resettlement Requirements under National Law and Applicable International Standards

Resettlement issue	Ghanaian legislative requirement	Requirement under applicable international standards (AfDB OS 5, 7 & 10)	Potential gap	Gap closure
Timing of compensation payment	Prompt payment of fair and adequate compensation. Compensation must be paid prior to any commencement of the development. The State shall resettle displaced inhabitants on suitable alternative land with due regard for their economic well-being, social and cultural values. Compensation for stool land to be paid to the traditional authority and not to those losing access to land.	Possession of acquired land only after compensation has been made available. Compensation for economic displacement resulting from land acquisition should be made promptly and wherever possible prior to impact, to minimise adverse impacts on the income stream of those who are displaced.	Timing for Compensation payments is unspecified under Ghanaian Law.	Compensation payments will be done prior to project commencement or displacement. The Project will take responsibility for issuing compensation payments to have direct on-the-ground control over payments.

Resettlement issue	Ghanaian legislative requirement	Requirement under applicable international standards (AfDB OS 5, 7 & 10)	Potential gap	Gap closure
Amount of compensation	Market value or replacement value and disturbance cost. There is no specific provision for assistance with relocation or transaction costs.	Rate of compensation for lost assets should be calculated at full replacement cost, (i.e., the market value of the assets plus transaction costs). Affected business owners will be compensated for the cost of re-establishing commercial activities elsewhere, for lost net income during the period of transition, and for the costs of the transfer and reinstallation of their business structures, plant, machinery, or other equipment. Affected farmers will be compensated at full replacement cost for farmland and crops are affected by acquisition.	Compensation for loss of assets is not at full replacement cost. Therefore, requirement to validate that government valuation of affected assets reflects full replacement cost. There is no specific provision for other assistance for relocation or transaction costs associated with improving or restoring standards of living or livelihoods.	The Replacement Cost Approach will be adopted for the calculation of compensation. Project consultant will monitor compensation rates approved by Land Valuation Division (LVD) to verify that they reflect full replacement costs.
Squatters	No provisions. Squatters are deemed ineligible for compensation.	Economically displaced persons who are without legally recognisable claims to land to be compensated for lost assets other than land (such as crops, irrigation infrastructure and other improvements made to the land), at full replacement cost. Opportunistic settlers who encroach on the project area after the cut-off date for eligibility are not required to be compensated.	Risk of making PAPs worse off as compared to pre-displacement condition.	All eligible owners of pre-cut off date assets (buildings, crops etc.) will be considered for compensation (but no compensation for land) and treated equally regardless of legal tenure.

Resettlement issue	Ghanaian legislative requirement	Requirement under applicable international standards (AfDB OS 5, 7 & 10)	Potential gap	Gap closure
Resettlement [Physical displacement]	Physically displaced inhabitants are to be resettled on suitable land with due regard for their economic well-being and social and cultural values.	Requirement to (i) offer displaced persons choices among feasible resettlement options, including adequate replacement housing or cash compensation where appropriate; and (ii) provide relocation assistance suited to the needs of each group of displaced persons. Compensation in kind should be considered in lieu of cash. Cash compensation levels should be sufficient to replace the lost land and other assets at full replacement cost in local markets. Relocation assistance should be provided to people who are physically displaced by a project. Assistance may include transportation, food, shelter, and social services that are provided to affected people during the relocation to their new site.	Requirement to provide a choice of options for compensation, including cash. Requirement to cover all costs for relocation assistance.	There is no anticipated physical displacement or land acquisition by the project as project is designed around existing farmers who already own lands. However, if there is a potential of physical displacement upon acquisition of land for the project during implementation, should the need arise, appropriate compensation will be provided based on agreed option to affected persons.

Resettlement issue	Ghanaian legislative requirement	Requirement under applicable international standards (AfDB OS 5, 7 & 10)	Potential gap	Gap closure
Livelihoods Restoration & Resettlement Assistance	There are no specific laws or regulations specifying support for livelihood restoration and transition and moving allowances	Transitional support should be provided as necessary to all economically displaced persons, based on a reasonable estimate of the time required to restore their income earning capacity, production levels, and standards of living. Provide opportunities to improve, or at least restore, means of income earning capacity, production levels, and standards of living. This could include measures related to agricultural inputs (e.g., seeds, seedlings, fertilizer, irrigation), skills and business training, job placement, and access to credit. Assistance should also be made available to the employees of the business to compensate for their temporary loss of employment.	Ghanaian policy and legislation would need to be aligned with Bank policy to effectively guarantee rights of all affected persons of involuntary resettlement.	For those that are eligible, resettlement assistance in terms of moving allowances, loss of earnings etc. will form part of compensation framework, in addition to longer term livelihood development programs.

Resettlement issue	Ghanaian legislative requirement	Requirement under applicable international standards (AfDB OS 5, 7 & 10)	Potential gap	Gap closure
Vulnerable Groups	No specific provision.	Identify persons who are vulnerable. Persons identified as vulnerable should be assisted to fully understand their options for resettlement and compensation. Members of vulnerable groups may require special or supplementary resettlement assistance because they are less able to cope with the displacement than the general population. Compensation and restoration packages for vulnerable people should include additional forms of support and should favour the lowest risk mitigation options wherever possible, e.g., in-kind compensation over cash compensation.	Vulnerable PAPs given the same treatment as all others.	Further assistance to be given to this category of PAPs to enable them restore their living standards to pre-project levels at least. This will take the form of financial or non-financial support.
Consultation & Information Disclosure	The owner/ tenants on the land must be formally notified at least a week in advance of the intent to enter and be given at least 24 hours' notice before actual entry.	Disclosure of eligibility and entitlements including compensation and livelihood restoration packages should take place sufficiently early in the project's planning process to allow potentially displaced people sufficient time to consider their options. Ensure that vulnerable people have been adequately engaged.	Affected persons are not kept abreast with the project timelines leaving them unprepared to fit into implementation schedules.	Persons to be potentially displaced and PAPs generally will receive timely and relevant information, consult on resettlement options, and offered opportunities to participate in planning, implementing, and monitoring resettlement. Detailed public consultation plan and communication strategy will ensure informed participation throughout the project life.

Resettlement issue	Ghanaian legislative requirement	Requirement under applicable international standards (AfDB OS 5, 7 & 10)	Potential gap	Gap closure
Grievances	Formal and informal mechanisms and formal access to court of law.	Establish a grievance mechanism to receive and address specific concerns about compensation and relocation raised by displaced persons, including a recourse mechanism designed to resolve disputes in an impartial manner. The grievance mechanism should consider the availability of judicial recourse and community and traditional dispute settlement mechanisms.	No intermediate avenues for redress other than a court of law.	Appropriate and accessible grievance mechanisms will be established. The GRM will be accessible, reliable and transparent.
Monitoring & Evaluation	No specific provision	Establish procedures to monitor and evaluate the implementation of a Resettlement Action Plan or Livelihood Restoration Plan and take corrective action as necessary. Depending on the scale and/or complexity of physical and economic displacement associated with the project, conduct an external completion audit to assess whether the provisions have been met.	Difficulty in gauging the effectiveness of prescribed mitigation, especially before implementation of measures.	A detailed monitoring and evaluation program is included as part of the RAP implementation program and a completion audit will be undertaken as part of the overall project management process.

3.0 SOCIO-ECONOMIC BASELINE AND CENSUS SURVEY

3.1 Introduction

Baseline socio-economic conditions are summarized according to the district context (mostly data compiled from secondary sources) and the baseline conditions specific to the potential beneficiary communities (reflecting the findings of the primary data collection). The baseline is presented in the following sections:

- Demographics
- Education and literacy
- Economic activity
- Income, assets and expenditure
- Land use and ownership
- Health
- Utilities and services
- Vulnerability

3.2 District-wide Description of Socio-Economic Conditions

This section describes the socio-economic conditions of the Nandom Municipality focusing on variables that provides valuable insight into the lives of the people in the area.

Demographics

The municipality, according to the 2021 Population and Housing Census, has a total population of 51,328 comprising 25,577 (49%) males and 25,751 (51%) females. This is about 5.7% and 0.2% of the regional and national population respectively. The population density is 132.8 persons per sqkm with a total of 9,864 households and a household size of 5.0 persons per household which is lower than the regional average of 5.2. The municipality has a very youthful population with about 90% below 60, according to the 2021 Population and Housing Census.

The Dagaabas are the predominant ethnic group with other minor tribes such as the Hausa, Mossi, Sissala, Asante etc. Unlike other parts of Northern Ghana, the population of Christians is above the Islam population in the municipality. There are three main religious groups namely, Christianity (36%), Islam (32%) and Traditional (29%) in that order in the municipality.

Education and Literacy

In terms of literacy, 49% of the municipality's population 11 years and older are illiterate. Of the literate population, the majority (56%) are literate in English and Ghanaian language. Again, 55% are currently enrolled in primary school, compared to 33% who have previously attended primary school. There is a significant decrease in the proportion of people in the district who are currently attending JHS (22%) compared to those who are now in SSS/SHS (7%). In addition, 1% are currently enrolled in tertiary education, while 6% have previously attended tertiary education. Males (1.1%) outnumber females (0.8%) in terms of tertiary education enrollment. Furthermore, the proportion of males (7%) who have previously obtained tertiary education is higher than that of females (3%).

Economic activity

Most (78%) of the economically active population are engaged in agriculture, forestry and fishery work, 10% in craft and related trade and 4% in service and sales. About 5% are engaged as managers, professionals, and technicians. Considering that farming is the people's main occupation, it implies that their main sources of livelihood and income are limited during the dry season, resulting in the migration of the youth to the south in search of greener pastures. As a result, adequate irrigation facilities are required to promote and enhance agricultural activities during the dry season.

Land use and ownership

Land ownership follows a patrilineal system with regards to land inheritance. Accordingly, inheritances can go to the male's sons or brothers. Dagaabas are the land custodians, and according to the customs that have been passed down, women are barred from land ownership and entitlements, which are mostly acquired through inheritance.

Land ownership in traditional society tends to be acknowledged by communal recognition and observation, or that of the ruling traditional elder. Deeds or papers are not usually involved, nor are lawyers. The existence of deeds or papers usually indicates a previous dispute over the land which was taken to the court system. When a conflict emerges the traditional avenue for resolution is to have the traditional elder arbitrate. However, this process usually only works when both parties respect the traditional elder. If one or both parties lack confidence in the traditional elder, local politicians are frequently asked to arbitrate.

Land disputes may be taken to the court system, but these are costly and, in the case of royal land, they can drag on as each party seeks to appeal every judgement that goes against it. In some areas, recourse to the courts is less likely because of the costs involved and less acceptance of that system as a dispute settling mechanism.

Nevertheless, even if a case goes before the courts, the land may still be used and/or occupied by the disputants since it often is the source of livelihood of the disputants. Force may be used to settle cases where traditional authority is ineffective.

The project is not designed to acquire lands for project implementation. However, farmers who already own lands and meet other requirements will be supported. Due diligence will be done to ensure that ownership of farmlands is undisputed.

Health

The Municipal Health Administration is the highest implementing agency in the municipality and is in charge of the Ghana Health Services. The area is divided into five Sub-areas, each of which provides comprehensive Public Health Services. Four health centers and one polyclinic serve all five sub-areas. St. Theresa's Hospital is a CHAG facility that also serves as the municipal hospital. With the implementation of the CHPs concept to improve access to health care services, the municipal area now operates thirteen (13) CHPS compounds.

Utilities and services

Energy

The municipality's energy supply is a major source of concern as only 27% of the population is connected to the national grid with 41% using kerosene as their primary source of energy for lighting. Firewood and charcoal remain the primary sources of energy for cooking, further depleting the vegetation. As a result, there is a need to extend electricity to underserved communities and ensure district-wide access to LPG.

Water Supply

Boreholes account for 72% of the municipality's drinking water supply, followed by pipe borne outside dwellings (10%), 7% from pipe-borne inside dwelling and 4% from public taps/stand pipes. Majority of rural households (81%) rely on boreholes/pump/tube wells for drinking water, while only a few in the urban sector do (31%).

Currently, there is one (1) mechanized small-town water system in Nandom, the district capital. There are also 452 boreholes in the District out of which 39 are for schools and clinics, 29 are private and used privately, 19 are low yielding and hardly produce water during the dry season and 24 of them are bad wells and cannot produce potable water. Thirty-nine (39) of these are also in Nandom Township.

Sanitation and Waste Management

The sanitation situation in the municipality is among the best in the region, and it ranks first in the region's Open Defecation Free (ODF) League Table with about 91% of communities certified and declared ODF. Majority of households in these communities have their own latrines and an increase in hand washing awareness is resulting in fewer faecal matter-related diseases in the municipality (MTDP 2021, Nandom). There are 728 public KVIP/institutional latrines. Out of a total of 9886 households in the District, only 1408 households do not have household latrines representing 14%.

3.3 Socio-Economic Baseline Conditions of Project Affected Communities

This section describes the socio-economic conditions of the project affected communities (Koo and Kpee) within the Nandom Municipality. The focus is on variables that provides valuable insight into the lives of the people in the affected communities as outlined in the introduction section of this chapter.

3.3.1 Approach to Primary Data Collection

Collection of primary baseline data was done through a socio-economic census survey targeting households identified to be potentially impacted by the Project either directly or indirectly. Also, qualitative data was collected through focus group discussions (FGDs), key informant interviews (KIIs), wider community meetings and general observation from 15th April 2025 to 30th May 2025. A copy of the data collection instrument for the census and socio-economic survey is attached in **Annex 2**.

3.3.2 Project Affected Communities

Data collection was done in the project affected communities in the Nandom Municipality. These communities (see Table 3-1) will be directly affected by implementation of the project.

Table 3-1: Project affected communities

District	Rice Valley Communities
Nandom Municipality	Ko
	Kpee

Source: Household Survey, May 2025, SAL Consult

3.3.3 Community Engagement

Meetings were held in Ko and Kpee with chiefs (Traditional Authority), Assembly members, opinion leaders, and community members including women, youth, persons with disability and project affected persons. Records of engagement are attached as **Annex 5**.

Activities undertaken by the RAP team include community entry, census enumeration, and assessment of project impact on PAPs. Other activities include focus group discussions with men, women and youth with the aim of collecting qualitative information on land use and ownership, livelihood activities and income generation, education, health and wellbeing to characterise the broader social context and supplement household surveys.

3.3.4 Household Surveys

Quantitative demographic data, asset ownership, livelihood and vulnerability data among others were collected by administering a census questionnaire to potential Project Affected Households (PAH). In selecting households for the survey, Focus Group Discussions and Key Informant Interviews were used to identify households and persons that could potentially be affected. Also, a field team assessed the project area and farmers who earn a living from the land and its resources. The survey was administered to sections of households in the community as they are considered to be part of the larger population which will potentially be impacted by the project, either directly or indirectly through loss of assets, loss of income or loss of means of livelihood.

A total of 16 respondents (i.e. household heads), were interviewed as part of the census survey within the 2 affected communities in the Nandom Municipality. A summary of the number of households participating in the survey per community is provided in Table 3-2 below.

Table 3-2: Households Surveyed in the Nandom Municipality

Communities	Households Surveyed
Ko	4
Kpee	12
Total	16

Source: Household Survey, May 2025, SAL Consult

3.3.4.1 Demographics

3.3.4.1.1 Gender of Respondents

All 16 respondents (100%) surveyed in the communities were males as captured in the dataset.

Table 3-3: Gender of Respondents in Nandom Municipal project communities

Gender of Respondent	Count	Percentage %
Male	16	100
Total	16	100

Source: Household Survey, May 2025, SAL Consult

Figure 3-1: Gender of Respondents

3.3.4.1.2 Age of Respondents

The ages of the 16 respondents ranged from 33 to 69 years, with an average age of approximately 48.8 years. The largest group of respondents (56%) falls within the 31-50 years age bracket,

followed closely by those aged 51 years and above (44%). Younger adults, aged 18-30 years, were not represented in this sample, with the youngest respondent being 33 years old.

Table 3-4: Age of Respondents

Age Category	Count	Percentage %
31-50 years	9	56
51 years and above	7	44
Total Respondents	16	100

Source: Household Survey, May 2025, SAL Consult

Figure 3-2: Age distribution of respondents

3.3.4.1.3 Marital Status of Respondents

The vast majority of respondents, 14 out of 16 (88%), were married. One respondent (6%) was divorced, and another one (6%) was a widower.

Table 3-5: Marital status of respondents

Marital Status	Count	Percentage %
----------------	-------	--------------

Married	14	88
Divorced	1	6
Widower	1	6
Total	16	100

Source: Household Survey, May 2025, SAL Consult

Figure 3-3: Marital Status of Respondents

3.3.4.1.4 Ethnicity and Religion

All the respondents (100%) identified their ethnicity as "Other," with further specification as Dagaare, Dagaaba, or Dagara. This indicates that while grouped under "Other" in a primary category, they belong to closely related Dagaari-speaking groups.

On religious belief, the majority of respondents, 15 out of 16 (93%), identified their religion as Christians while one respondent (7%) identified as Moslem.

Table 3-6: Ethnicity of respondents

Ethnic Identification	Count	Percentage %
Dagaare	4	25
Dagaaba	7	44
Dagara	5	31

Ethnic Identification	Count	Percentage %
Total	16	100

Source: Household Survey, May 2025, SAL Consult

3.3.4.1.5 Household Size of Respondents

Data on household size, including the number of males and females, was available for all 16 surveyed respondents. These 16 households comprise a total of 97 individuals, with an average household size of approximately 6.1 persons. Household sizes range from a minimum of 4 to a maximum of 10 members.

Overall, within these 16 households, there are 48 males (49%) and 49 females (51%), indicating a very balanced gender composition. On average, households have about 3 males and 3.06 females.

The distribution of household sizes shows that households with 4-6 members are the most common (62%). Households with 7-9 members account for 32% of the sample. One household had 10 members.

Table 3-7: Respondents Household Size

Household Size Category	No. of Households (N=16)	Percentage of HHs %	Total Persons in Category	Total Males in Category	Total Females in Category	Avg. Males per HH in Category	Avg. Females per HH in Category
4-6 members	10	62	52	27	25	2.70	2.50
7-9 members	5	32	35	17	18	3.40	3.60
10-12 members	1	6	10	4	6	4.00	6.00
Totals / Overall Avg.	16	100	97	48	49	3.00 (Overall Avg.)	3.06 (Overall Avg.)

Source: Household Survey, May 2025, SAL Consult

3.3.4.2 Educational Level of Respondents

Nine out of 16 respondents (60%) reported having no formal education. Four respondents (24%) had completed University, three (16%) had completed Primary School. The educational background could therefore be described as generally low.

Table 3-8: Level of education of Respondents

Educational Level	Count	Percentage %
None (No formal Ed.)	10	60
Completed Primary School	3	16
University	4	24
Total	16	100

Source: Household Survey, May 2025, SAL Consult

3.3.4.3 Economic Activities

This section outlines the primary and secondary income sources and employment status of the household representatives surveyed.

3.3.4.3.1 Primary Source of Income

The primary source of income for the majority of households (81%) is farming. Two households (12%) reported Office Work, and one (7%) reported Small Business/Trade as their primary income source. This shows that agriculture is a vital livelihood for the people.

3.3.4.3.2 Secondary Source of Income

Livestock rearing was the most common secondary income source, reported by 6 respondents (37%). Farming (as a secondary activity) was mentioned by 3 respondents (18). Small Business/Trade and Fishing were each mentioned by 1 respondent (6% each). Five respondents (33%) did not specify a secondary income source or indicated none.

Figure 3-4: Respondents Secondary Source of Income

3.3.4.3.3 Employment Status

Most respondents, 10 out of 16 (62%), identified as Self-Employed. Four respondents (25%) reported being Unemployed, and two (13%) were in Full-time employment. Generally, the respondents are engaged in one economic activity or the other.

Table 3-9: Employment Status of Respondents

Employment Status	Count	Percentage %
Self Employed	10	62
Unemployed	4	25
Full-time	2	13
Total	16	100

Source: Household Survey, May 2025, SAL Consult

Figure 3-5: Employment Respondents

3.3.4.4 Household Assets

The respondents households own a number of assets. The most commonly owned assets among the 16 households include: Radio (81%), Cutlass (82%), Bicycle (62%), TV (56%), and Motorbike (57%). Furniture was owned by 18% and Fridge owned by another 18%. Respondents chose multiple household assets under different categories.

Figure 3-6: Household Assets

3.3.4.5 Health

This section provides insights into the common health issues, healthcare preferences, and disability status within the surveyed households.

3.3.4.5.1 Common Health Conditions

The data revealed that malaria is overwhelmingly the most reported health condition in the project affected communities, affecting 15 out of 16 households (93). Ulcer was mentioned by 50% of households, and Diarrhea and Fever by 25% each. High blood pressure was reported by 7% of households. This shows that malaria continuous to represent basic health challenge in the area.

Table 3-10: Common Household Health Conditions

Common Health Condition	Households Reporting	Percentage %
Malaria	15	93
Ulcer	8	50
Diarrhea	4	25
Fever	4	25
High blood pressure	1	7

Source: Household Survey, May 2025, SAL Consult

3.3.4.5.2 Preferred Medical Service Provider

Public hospitals are the most preferred medical service provider, chosen by all 16 respondents (100). Traditional medicine is also a significant option for 8 respondents (50%). Pharmacist/Chemist services were chosen by 50%, and Community Health Center/Post by 32%. Private hospitals were less frequently cited (12%). Respondents could select multiple providers. This calls for greater investment in public health infrastructure and systems as the people heavily depend on these facilities for all healthcare needs.

Table 3-11: Respondents preferred Medical Service Provider

Preferred Medical Service Provider	Count	Percentage%
Public Hospital	16	100
Traditional Medicine	8	50
Pharmacist/Chemist	8	50
Community health center/post	5	32
Private hospital	2	12

Source: Household Survey, May 2025, SAL Consult

3.3.4.5.3 Household Disability Status

Two out of 16 households, (12%) reported having at least one member with a form of disability. The types mentioned include Mental Disability and Blindness. The data shows a general low disability status among the respondents' households which is good for their socio-economic wellbeing.

Figure 3-7: Households Disability Status

3.3.4.6 Income and Expenditure

This section looks at the reported income levels of households and their main areas of expenditure.

3.3.4.6.1 Income Levels

The majority of households (62%) reported an income level below GHc500. Three households (18%) earned between GHc501-GHc2,000, and three (18%) earned between GHc2,001-GHc5,000. The data shows the households generally are of low-income status which has serious implications for the households standard of living.

Table 3-12: Household Income Levels

Income Levels (Ghc)	Count	Percentage %
Below GHc500	10	64
GHc501-GHc2,000	3	18
GHc2,001-GHc5,000	3	18

Source: Household Survey, May 2025, SAL Consult

3.3.4.6.2 Expenditure Items

A number of expenditure items takes up household income. The data shows that Food, Education, and Health are the primary areas of expenditure, each reported by 14 out of 16 households (87%). Utilities were mentioned by 68% and Transportation by 51%.

Table 3-13: Households Expenditure Items

Main Areas of Expenditure	Households Reporting	Percentage %
Food	14	87
Education	14	87
Health	14	87
Utilities	11	68
Transportation	8	51

Source: Household Survey, May 2025, SAL Consult

3.3.4.7 Utilities and Services

This section examines access to essential services by household. These utilities include water, sanitation, and energy for cooking and lighting.

3.3.4.7.1 Water Supply and Distance

The primary source of drinking water for all 16 households (100%) surveyed is a Borehole. One household also mentioned GWCL (Ghana Water Company Ltd.). Distances to water sources are generally short, often within 0.5 km, with some reporting "00km" (presumably very close) or "water is inside" facility.

3.3.4.7.2 Sanitation and Waste Management

The majority of households (82%) use a Pit Latrine with slab. Two households (12%) use a KVIP (Kumasi Ventilated Improved Pit) latrine, and one (6%) uses a Bucket Latrine.

Table 3-14: Household sanitation facilities

Sanitation facility	Count	Percentage %
Pit Latrine with slab	13	82
KVIP	2	12
Bucket Latrine	1	6

Source: Household Survey, May 2025, SAL Consult

3.3.4.7.3 *Main Source of Energy for Lighting and Cooking*

Charcoal is the primary source of energy for cooking for 8 households (50%), and Firewood is used by the other 8 households (50%). These energy sources have serious implication forest resources and climate change as a whole.

For lighting energy sources, all 16 households (100%) use Electricity (NEDCO) as their main source of energy for lighting.

3.3.4.8 Community Households Vulnerability

This section assesses the socio-economic vulnerabilities within the Nandom Municipal project communities (Ko and Kpee) based on defined criteria from the survey data.

3.3.4.8.1 *Defining Vulnerability Criteria*

For this analysis, vulnerability is assessed based on the presence of the following indicators within each surveyed household/respondent's profile:

- **V1: Low Income:** Household income is "Below GHc500".
- **V2: No Formal Education of Respondent:** Educational level is "None (No formal Education)".
- **V3: Disability in Household:** The household reports a member with a disability.
- **V4: Poor Sanitation:** Defined as using "No facility/Bush". In this sample, no household fell into this category, as all reported using some form of latrine.⁴ Therefore, this vulnerability score is 0 for all households surveyed.
- **V5: Respondent Unemployed:** The respondent's employment status is listed as "Unemployed".

3.3.4.8.2 *Vulnerability Matrix: Distribution of Households by Number of Vulnerabilities*

The following Table 3-15 shows how many households exhibit a certain number of the five defined vulnerability indicators. Each of the 16 surveyed units was assessed against these criteria. This matrix provides a summary of how vulnerabilities are distributed. A higher number of concurrent vulnerabilities indicates a more precarious socioeconomic situation. The prevalence of each vulnerability factor was as follows:

- V1 (Low Income <GHc500): 10 households
- V2 (No Formal Education of Resp.): 9 households
- V3 (Disability in HH): 2 households
- V4 (Poor Sanitation - No facility/Bush): 0 households
- V5 (Respondent Unemployed): 4 households

Table 3-15: Households Vulnerability

Number of Vulnerability Factors Present	Number of Households (N=16)	Percentage of Households %
1 Vulnerability	6	38
2 Vulnerabilities	9	56
3 Vulnerabilities	1	6
Total Households Surveyed	16	100

Source: Household Survey, May 2025, SAL Consult

Note: This table is generated by analyzing each of the 16 respondent entries against the 5 vulnerability criteria and counting how many criteria apply to each.

3.4 Socio-Economic Baseline Conditions of Project Affected Persons

This section describes the socio-economic conditions of the project affected persons identified in Ko and Kpee communities. Thirty-nine (39) PAPs will suffer both loss of farmland and temporal economic displacement. The list is provided in **Annex 7**.

The focus of this socioeconomic profiling of PAPs is to gain insights into the lives of the people whose livelihood will be impacted directly as a result of the project implementation.

3.4.1 Demographics of Project Affected Persons

3.4.1.1 Gender of PAPs

Of the 39 PAPs, 38 were male and 1 was female. This indicates an overwhelming proportion of males who farm on the project land.

Table 3-16: Gender of Project Affected Persons

Sex of PAPs	Count	Percentage %
Male	38	97
Female	1	3
Total	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.1.2 Age of PAPs

The ages of the PAPs ranged from 26 to 76 years, with an average age of approximately 46.6 years.

Table 3-17: Age of Project Affected Persons

Age Category	Count	Percentage %
18-30 years	2	5
31-50 years	25	64
51 years and above	12	31
Total PAPs	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.1.3 Educational Level of PAPs

A significant proportion (44%) of the PAPs have no formal education with only 38% having completed Primary school and Senior High School. Details of the PAPs education are captured in Table 3-18.

Table 3-18: Educational level of Project Affected Persons

Educational Level	Count (N=39)	Percentage %
None (No formal Ed.)	17	44
Completed Primary School	5	13
SHS Drop out	3	8
Completed SHS	10	25
University	4	10
Total	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.1.4 PAPs Household Size

The 39 PAPs surveyed have households comprising a total of 310 individuals, with an average household size of approximately 8 persons. Household sizes show significant variation, ranging from a minimum of 5 to a maximum of 15 members.

Table 3-19: PAPs Household Size

Household Size Category	No. of Households (N=39)	Percentage %
4-6 members	11	28
7-9 members	20	51
10-12 members	3	8
13+ members	5	13
Totals	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.2 Economic Activities of PAPs

3.4.2.1 Primary Source of Income

Farming constitutes the primary source of income for the vast majority of PAPs (80%). Other important income sources include; construction works and livestock rearing.

Table 3-20: PAPs Primary Sources of Income

Primary Source of Income	Count	Percentage %
Farming	31	80
Other (Construction)	4	10
Office work	3	8
Livestock rearing	1	2
Total	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.2.2 Secondary Source of Income

Livestock rearing was the most recorded secondary income of source reported by majority of the PAPs (54%). Other secondary income sources are farming and artisanship.

Table 3-21: PAPs Secondary Sources of Income

Secondary Source of Income	Count (N=39)	Percentage %
Livestock rearing	21	54
Farming	3	8
"Other (e.g. Mason, Sewing, Mechanic)"	4	10
Small Business/ Trade	2	5
Office work	1	3
None specified/Not applicable	8	20
Total	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.3 Household Assets of PAPs

The most owned assets among the 39 households include a cutlass (80%), a bicycle (69%), and a radio (67%). Televisions (49%) and motorbikes (36%) are also common assets among the PAPs.

Table 3-22: PAPs Household Assets

Asset	Households Owning (N=39)	Percentage
Cutlass	31	80%
Bicycle	27	69%
Radio	26	67%
TV	19	49%
Motorbike	14	36%
Furniture	12	31%
Fridge	8	21%

Source: PAPs Survey, May 2025, SAL Consult

3.4.4 Income and Expenditure of PAPs

3.4.4.1 Income Levels from Rice Sales

A significant number of the Project Affected Persons (93%) reported an annual income from the sale of rice of GHS 2,000.00 or less. This shows that even though the amount realized from the sale of rice is low and nothing to write home about, rice production nevertheless offers economic opportunity to the people for which the right incentives must be provided to boost production which will better incomes in the long run.

Table 3-23: PAPs Income Levels from Rice Sales

Income Levels (Ghc)	Count	Percentage %
Below Ghc 500.00	17	44
"Ghc 501.00-Ghc2,000.00"	19	49
"Ghc 2,001.00-Ghc 4,500.00"	2	5
"Ghc 4,501.00 and Above"	1	2
Total	39	100

Source: PAPs Survey, May 2025, SAL Consult

3.4.4.2 PAPs Households Main Areas of Expenditure

Basic household necessities dominated the expenditure item areas of PAPs. Food, education, and health constituted the primary areas of expenditure for nearly all PAPs, indicating the importance of these to household maintenance.

Table 3-24: PAPs Households areas of Expenditure

Main Areas of Expenditure	PAPs Reporting (N=39)	Percentage %
Food	33	85
Education	33	85
Health	32	82
Utilities	29	74
Transportation	27	69

Source: PAPs Survey, May 2025, SAL Consult

4.0 IDENTIFIED RESETTLEMENT RELATED ISSUES

4.1 Introduction

This section provides details on resettlement issues that are relevant to the project. These issues requires that they are adequately addressed in order to meet applicable international standards (AfDB) and Ghanaian laws. The RAP exercise falls under OS5- Land Acquisition, Restrictions on Access to Land and Land Use, and Involuntary Resettlement of the African Development Bank.

The OS5 recognizes that project-related land acquisition, restrictions on land access or land use, and loss of property/assets can have adverse impacts on communities and persons. Project-related land acquisition and restrictions on land use may cause physical displacement (relocation, loss of residential land or loss of shelter), economic displacement (loss of land, assets or access to assets, leading to loss of income sources or other means of livelihood), or both. Physical and economic displacement, if unmitigated, may give rise to severe economic, social and environmental risks. This OS requires the Borrower to demonstrate that involuntary land acquisition or restrictions on land use are limited to direct project requirements for clearly specified project purposes within a clearly specified period of time. However, when land acquisition or restrictions on land access and use (whether permanent or temporary) cannot be avoided, the Borrower shall offer affected persons compensation at full replacement cost, and other assistance as may be necessary to help them improve or at least restore their standards of living or livelihoods.

Under Ghanaian legislation, the Constitution of the Republic of Ghana, 1992; The Land Act, 2020 (Act 1036), and Ghana's National Land Policy, 1999 makes provision for resettlement issues relating to land acquisition for any kind of development and how these issues should be addressed. These legislations are clear on the guidelines for the acquisition and the requirement for the payment of fair and adequate compensation to land owners and project affected persons arising from physical, economic displacement, and damage to property etc.

4.2 Potential RAP Issues

There are a number of resettlement issues that are related to development projects involving land use. These issues are of varying impacts and duration. Key resettlement issues that projects generally deal with includes; land acquisition, economic displacement, physical displacement and loss of structures or damage to property.

4.2.1 Land Acquisition

Land Acquisition as part of a Resettlement Action Plan (RAP) in Ghana is a crucial process in the implementation of projects such as agriculture, roads, dams, or mining - that require involuntary resettlement of individuals or communities. It involves securing land legally and fairly while ensuring that Project-Affected Persons are adequately compensated and resettled.

In Ghana, land is primarily acquired through customary land tenure, where traditional leaders (stools, skins, clans, and families) allocate land, and state-owned land acquired through

government processes. Additionally, government, private individuals or groups can acquire land through legal means. Land can be acquired by the State through compulsory acquisition, where an executive instrument is issued by the President, usually under the State Lands Act, 1962 (Act 125). It declares that specific land, excluding that already under the Administration of Lands Act, 1962 (Act 123), is required for the public interest. This instrument effectively vests the land in the President, but the original owners (stool or skin) may still retain a stake in the land and receive rent or payments from the State. Land can also be acquired through purchase or Lease for a number of years, where appropriate compensation is paid to right owners.

4.2.2 Physical Displacement

Physical displacement refers to the loss of shelter and/or assets as a result of land acquisition, requiring people to move to another location. This can involve; residential structures, community buildings and services as well as livelihood sources attached to land. When physical displacement is identified as a potential project impact; legal title holders, tenants, informal settlers (under some conditions) are eligible for the payment of compensation by project proponent. Compensation for this type of impact range from; replacement of housing or land, compensation for lost assets (structure, trees, crops) and moving and relocation assistance.

4.2.3 Economic Displacement

Economic displacement refers to the loss of income sources or means of livelihood resulting from land acquisition or land use change associated with a development project, even if the affected people are not physically relocated.

As part of a Resettlement Action Plan (RAP), addressing economic displacement ensures that affected people do not suffer a decline in their livelihoods or living standards due to the loss of access to land, assets, or income-generating activities. Persons that can be displaced economically due to project development include; farmers (loss of farmland), traders and market vendors (loss of space or customer access), artisans and service providers, tenants or sharecroppers and informal workers.

For this category of impact compensation measures vary. These include; cash compensation for loss of crops, business income, or access to land; land-for-land options (if feasible); and assistance for restoring livelihoods, not just for physical assets. When it is necessary for livelihoods to be restored; skills training (tailored to local economic opportunities), microfinance or credit schemes, job placement or employment in project-related activities, support for agricultural inputs, extension services, or irrigation and support to vulnerable groups, including women, youth, and the elderly can be deployed as measures to restore PAPs livelihoods.

4.2.4 Loss of Structure

Loss of structure as part of a Resettlement Action Plan refers to the demolition, relocation, or damage to physical structures - such as homes, shops, storage buildings, fences, etc. as a result of the development of a project. These structures include any immovable property built or used by affected persons which is either fully or partially removed or rendered unusable due to the project.

Compensation for affected structures are paid at full replacement cost based on expert valuation guidelines. Eligible persons for this type impact include Project-Affected Persons which may comprise of landowners, tenants, encroachers (informal settlers, or even non-title holders). Entitlements such cash compensation, in-kind compensation (e.g., reconstructed homes or shops etc.) and transitional assistance are provided to PAPs.

4.3 Specific RAP Issues Related to the Project

The specific RAP issues related to the project are discussed in the section. These issues are; land acquisition, physical displacement, economic displacement, and Loss or damage to property (structure).

4.3.1 Land Acquisition

The project will not acquire lands, as it is designed such that communities through chiefs and individuals donate land for the project for the benefit of the communities. In the case of Kpee and Ko, the Chiefs of the communities, Sagraza Solomon and Naa Thomas Gyireh, who owns the land in the communities, have donated required land for the project. Therefore, there would not be land acquisition for the project and issues of compensation payment do not arise. Evidence of the voluntary donation of the land for the project is presented in **Annex 9 - Signed Voluntary Land Donation Form**.

4.3.2 Physical Displacement

There are no physical displacement issues on the project site as there are no structures on the land. The project site is also not inhabited by anyone to occasion displacement as a result of the implementation of the project.

4.3.3 Economic Displacement

There will be economic displacement due to the implementation of the project. This impact will arise as a result of the relocation of farmers on the project site. Even though the farmers will be beneficiaries of the project, they will be moved during land preparation for the project. As a result, they will have to undertake farming elsewhere. The chiefs Kpee and Ko have provided alternative lands, which is about 3-6 km away, for the affected farmers.

Assessment of the project impact on the communities revealed that a total of 39 farmers made up of 38 males and 1 female will be economically displaced. At the time of the assessment, there were no crops under cultivation or grazing on the project site as it was in the dry season when farming activities are not undertaken due to rainfed agriculture been practiced in the project area.

Table 4-1: PAPs to be economically displaced by the project

Community	Male	Female	Total Community PAPs
Nandom Kpee	17	1	18
Ko	21	0	21
Total	38	1	39

Source: PAPs Survey, May 2025, SAL Consult

Assessment of the direct and indirect impacts of the project on PAPs including impacts on land, assets, income, livelihood and social dynamics has been assessed to range from minor to moderate. Further assessment of the impacts is provided in Table 4-2.

Table 4-2: Project Impacts Assessment

Project Impacts Assessment	
Land	The size of the land donated for the project is 400 hectares. The land is owned by the project Community Chiefs and sections of the land were cultivated by the PAPs. The land will be prepared before allocation to beneficiary farmers for the cultivation of rice. The land preparation activities will involve the removal of vegetation and the creation of access routes to the valley and within the valley. The PAPs will lose access to the land during the land preparation period. However, after the land preparation, they will return to cultivate as parts of project beneficiaries.
Assets	No asset either movable or immovable were identified on the valley during field assessment. There are no physical structures as well as crops on the land. Also, there are no economic trees such as Shea and Dawadawa on the land. No asset will therefore be impacted by the implementation of the project.

Project Impacts Assessment	
Livelihood and Income	The implementation of the project will impact on the income of PAPs. During land preparation which is planned for the dry season when there are no farming activities due to lack of rainfall, the impact will be negligible as the farmers will not be undertaking any activity on the land during that period. However, when the land preparation extends into the planting season, the PAPs will be denied the opportunity to cultivate on the land. In order not to cause livelihood and income challenges when that arise, alternative farmland have been provided to the farmers to continue with their farming activities so that even in-case the land preparation extends into the planting season, the impact in terms of livelihood/income will not be felt. Therefore, during the land preparation phase, the impact will be largely be minor. During the project implementation phase, the impact on livelihood and income of farmers will be major. This is because, the farmers will get access to bigger farming lots, prepared farmlands, improved rice seedlings and extension support. This will significantly improve rice yields and result in higher income for the farmers. The project impact at this stage will therefore be major.
Social dynamics	The project's impact on the social dynamics of the people will be negligible. The farmers that will be offered opportunity to cultivate on the rice valley will come from the project communities (Ko and Kpee) and other surrounding communities. Therefore, there will be no impact on the culture and values of the people in respect of cultural adulteration. Families and communities that live close together will not be relocated to other communities or be scattered due to the project implementation as there is no settlement on the valley. This will protect the family and social cohesion of the people and maintain their traditional support systems. In terms of compensation payment triggering social unrest among the people, the same compensation package will be offered to PAPs due to the nature of project impact and such social unrest is not anticipated in any shape or form. Also, because there will not be displacement or relocation of settlement, the people will not be separated from their ancestral lands, shrines or burial places in their communities as well as other practices tied to land and its resources such as festivals. This will maintain the communities strong social harmony. The observation of social relations and cultural values will therefore not be negatively affected by the implementation of the project.

4.3.4 Loss or Damage to Property

There will be no damage to property or loss of property as a result of the implementation of the project. This is due to the absence of structures or any other property on the project site.

4.4 Project Affected Persons Vulnerability Status

4.4.1 Vulnerability Criteria and Prevalence

For the purpose of this assessment, vulnerability is defined by the presence of one or more of the following five indicators. Female Headed Households, Low Income, Large Household Size (10 or more members), Physical Disability, and Old Age (70+). The prevalence of each indicator across the 39 PAPs interviewed is detailed below.

- **V1: Low Income:** The household's annual income is GHS 2,000.00 or less. 29 out of 39 households (74%) meet this criterion.
- **V2: Female Headed Household:** The PAP is a female head of the household. 1 out of 39 households (3%) meets this criterion.
- **V3: Large Household Size:** The household has 10 or more members. 9 out of 39 households (23%) meet this criterion.
- **V4: Physical Disability:** The PAP has a physical disability. 0 out of 39 households (0%) meet this criterion.
- **V5: Old Age:** The PAP is 70 years of age or older. 2 out of 39 households (5%) meet this criterion.

4.4.2 Cumulative Vulnerability Analysis

The concentration of vulnerability becomes more pronounced when multiple factors are considered concurrently. Table 4-3 below illustrates how many PAPs face multiple, overlapping challenges based on the five criteria. Details of the specific vulnerabilities affecting each of the 39 PAPs is provided in **Annex 8 - Project Affected Persons Vulnerability Matrix**.

Table 4-3: PAPs Cumulative Vulnerabilities

Number of Vulnerability Factors Present	Number of PAPs (N=39)	Percentage %
0 Vulnerabilities	3	8
1 Vulnerability	28	72
2 Vulnerabilities	7	17
3 Vulnerabilities	1	3
Total	39	100

Source: PAPs Survey, May 2025, SAL Consult

5.0 COMPENSATION PLAN

5.1 Establishment and Communicating Cut-off-date

The objective of the cut-off date is to establish a deadline date for which project affected persons qualify for entitlement to compensation. Persons entering the project site after the Cut-Off Date are not eligible for compensation and/or resettlement assistance.

The consultant engaged the affected persons on the Project and the resettlement/compensation and grievance redress processes and solicited their concerns to inform the preparation of the RAP. The engagement was through focus group meetings and one-on-one with the PAPs during the census and socioeconomic surveys. Photographs of the PAPs at the meetings are presented in **Annex 6**.

Persons who encroach on the project site after the final valuation exercise on **May 30, 2025**, are therefore not entitled to or expected to receive any form of compensation unless their claims are investigated and found justified by the Grievance Redress Process put in place as part of this Report.

5.2 Valuation Exercise

5.2.1 Purpose and Scope of Valuation

The purpose of the valuation exercise was to assess the overall Compensation Payable as part of the assessment of resettlement related issues under the proposed project. The scope of the valuation covered temporal economic displacement and loss of income which will be occasioned by the project thereby necessitating the payment of compensation to persons to be affected.

5.2.2 Basis of Valuation

The basis of valuation is derived from the following documents:

- AfDB OS 5 – Land acquisition, Restriction on Access to Land and Land Use and Involuntary resettlement;
- Section 4(1) of the State Lands Act, 1962 (Act 125);
- Section 253 of the Land Act, 2020 (Act 1036); and
- Section 20 of the 1992 Fourth Republican Constitution of Ghana.

5.2.3 Valuation Process

The data gathering process involved:

- a) Enumeration of Project Affected Persons;
- b) Taking of pictures of identified project affected persons; and
- c) Determining the cost of transportation to alternative farmland.

5.2.4 Valuation Method and Rates

Loss of Income

During construction thus land preparation which is expected to be undertaken during the dry season where farming activities cease due to lack of rain, livelihoods will not be negatively impacted. However, if land preparation extends into the rainy season, livelihoods may be impacted and must be compensated for accordingly. To deal with this potential livelihood loss, alternative land has been provided by the land owners in Kpee and Ko to the affected farmers.

Estimation of Relocation /Transportation/Movement Cost

Relocation cost has not been estimated or determined. However, in order to facilitate the movement of PAPs to and from the alternative land allocated which is about 3-6 km from the communities, bicycles with a carrier which are commonly used by both men and women for transport to the farms and other places will be provided to the PAPs. The Consultants believes the bicycle option is more sustainable compared to cash compensation disbursement option which is likely to be used up by the PAPs even before onset of the rainy/planting season. The current average cost of a “Busanga” bicycle (see Figure 5-1) with a carrier which is predominantly used in northern Ghana by both males and females is GHc 1300.00. This amount will be multiplied by the total number of PAPs (39) to get the total cost of transportation compensation.

It is instructive to point out that, there are two (no. 2) PAPs who fall into the category of “Old Age” (70 years and above) and may not be able to use the bicycles earmarked for compensation. However, these PAPs could give the bicycles to other members of their households to commute to the farm to work as farming is usually done collectively by the households. Therefore, this category of PAPs will also be eligible for the bicycle as compensation for transportation.

Figure 5-1: A picture of a “Busanga” bicycle

Disturbance Allowance

Disturbance is considered as a reasonable expenses incidental to any necessary change of residence or place of work/business by any person having a right or interest in the affected property. Cost of disturbance is one of the components to be considered when determining compensation for PAPs as provided in the State Lands Act 1962. Disturbance to be occasioned through change in farm site will be compensated for by transportation assistance to PAPs through the provision of bicycles.

5.2.5 Description of compensation and assistance for different categories of PAPs

The type of compensation planned for the PAPs after evaluation of the project impact are; in-kind replacement of productive land to protect livelihoods, and transportation assistance to PAPs to facilitate movement to alternative land for the continuation of farming activities. The description of the forms of compensation and assistance to of PAPs are provided in the Table 5-1 below.

Table 5-1: Compensation description for category of impact

No.	Category of Impact	Description of compensation and assistance	Remarks
1.	Complete/permanent loss of property or use right.	Compensation not applicable	No land will be acquired by the project, as a result, no physical relocation cost is applicable.
2.	Temporary economic displacement (those who farm in the valley will lose income during land preparation period if it goes beyond the dry season earmarked for the land preparation works)	Alternative land for farming has been secured for the farmers. They are expected to continue farming activities at the alternative site.	Compensation in respect of economic displacement for the period of construction (land preparation). Identified alternative vast land is available to be used for farming and as pasture by PAPs.
3.	Temporal disturbance	Disturbance caused by change of farming site.	In place of direct cash compensation, bicycles with a carrier will be provided to all PAPs to facilitate transport to the new site. Bicycles are widely used by men and women to and from the farm and for other household activities.

5.2.6 Valuation Opinion

Having taken cognisance of the relevant value indicators like, category of impact, economic and institutional factors, and having conducted the appraisal in an objective manner in accordance with the Code of Professional Ethics of the Ghana Institution of Surveyors (GhIS), It is our considered opinion that the total heads of claim (i.e. estimated compensation to purchase bicycles to PAPs) to facilitate transportation to alternative land site for farming activities in the Nandom Municipality is **Fifty Thousand, Seven Hundred Ghana Cedis (GH¢50,700.00 / USD 4,810.25).**

Details of the valuation summary is presented in Table 5-2 and Summary matrix of PAPs and PAPs Consent Form are provided in **Annex 10 and Annex 11** respectively.

Table 5-2: Valuation Summary

Community	Beneficiary/PAP	Transportation/Disturbance Support				
		No. of Men Affected	No. of Women Affected	Total PAPs affected	Support per PAP	Total Support Applicable
Kpee	Farmers on the valley	17	1	18	GH¢ 1,300.00	GH¢23,400.00 USD 2,220.11
Ko	Farmers on the valley	21	0	21	GH¢ 1,300.00	GH¢27,300.00 USD 2,590.13
Total		38	1	39		GH¢50,700.00 USD 4,810.25

5.3 Compensation Disbursement Responsibility

The Ministry of Food and Agriculture (MoFA) is responsible for compensation disbursement. A representative of the Nandom Municipal Assembly or Sub-metros or the local Assembly member will serve as a witness during the presentation of the compensation to PAPs, if necessary. MoFA, with the support of the RAP consultant, will ensure that all PAPs identified are given the compensation due them.

5.4 Compensation Payment Procedures

Cash compensation will not be paid for disruption of economic activity as alternative land is allocated to the farmers. Farmers who cultivate crops on the project site during the farming season will be moved to the new land and will be assisted through the provision of bicycles to facilitate transportation prior to project commencement. Land preparation for farming will not be covered under the compensation plan as the area is a previous farmland. PAPs will undertake land preparation by themselves as they always do prior to farming seasons.

Each eligible affected person will sign a compensation claim form (as shown in **Annex 3** together with the authorized project representative. The compensation claim form clarifies mutual commitments as follows:

- On the project side: commitment to pay the agreed compensation (provision of a bicycle); and
- On the project affected person's side: commitment to vacate the land by the agreed date before project commencement (land is currently not under cultivation).

5.5 Eligibility/Entitlement Matrix

The eligibility and entitlement matrix is provided in Table 5-3.

Table 5-3: Eligibility and Entitlement Matrix

Affected Assets/ units	Type of impact	Entitled units	Eligibility criteria	Entitlement
Livelihood disruption/ loss of income	Economic activity	Person engaging in activity	Use affected land as a source of livelihood	1. Provision of an alternative farmlands 2. Transportation assistance to new site (Bicycle)

5.6 Assistance for Vulnerable Persons

Vulnerable persons were identified as part of the PAPs census and socioeconomic survey. The vulnerable PAPs fall within four categories namely; “Low Income”, “Large Household Size”, “Female Household Head”, and “Old Age”. These vulnerable PAPs may require some special assistance because they are less able to cope with the economic displacement and the temporary

inconvenience to be experienced than the affected PAPs population in general. The assistance will help to strengthen their source of livelihood and also help to protect their wellbeing as well as dependents. The REWARD Project should therefore consider extending assistance to these categories of vulnerable PAPs. This assistance may take the following forms:

- Assistance with basic farm inputs such as cutlasses, hoes, knapsack sprayers; storage sacks, weedicides/pesticides, fertilizer, improved seeds etc.;
- Training on modern agricultural practices including livestock rearing to boost productivity by the Municipal MoFA Extension Officers;
- Enrolment on the Livelihood Empowerment Against Poverty (LEAP) program to help cushion the livelihoods of the PAPs and their dependents;
- Enrolment on the Rural Enterprise Support program to acquire financial support for investment into their farms; and
- Assistance in gaining employment or establishment of alternative business as livelihood assistance to serve as an additional source of income.

5.7 Disclosure

5.7.1 Disclosure of Compensation Proposals and Grievance Redress Sections of the RAP to PAPs

As part of the disclosure process, the RAP Consultant will disclose the compensation proposal and the Grievance Redress section of the RAP to the PAPs. A copy each of the PAPs compensation profile and the names and contacts of the RAP Consultant team for grievance redress will be given and the necessary explanation and clarification provided to the PAPs. The PAPs will sign off if they agree to the compensation proposal and the relevant document received. All comments from the PAPs will be noted on the signed-off sheet.

5.7.2 RAP Disclosure

MoFA/REWARD PCU will submit copies of the final RAP to the AfDB for clearance and disclosure of the cleared final RAP on its website. MoFA/ REWARD Project Coordination Unit (PCU) will also ensure that copies of the cleared RAP or extracts of the cleared final RAP (core report without compensation cost) are sent to the Nandom Municipal Assembly to enable the PAPs, and other stakeholders such as Assembly members and any interested Non-governmental organizations (NGO) in the project area access the document. A public notice of the RAP disclosure will be placed at the Assembly premises and in the national dailies (e.g., Daily Graphic and Ghanaian Times) to notify the public/PAPs about where the RAP documents can be accessed.

6.0 INSTITUTIONAL ARRANGEMENT

6.1 Relevant Institutions

The institutional arrangement identifies the relevant institutions involved with the implementation of the RAP, their roles and responsibilities. The main institutions concerned with the implementation of the Project and the RAP related activities are provided in Table 6-1. The RAP implementation activities will be under the overall guidance of MoFA.

Table 6-1: Institutional Roles and Responsibilities

No.	Institution	Role/Responsibility Description
1.	AfDB	• Maintains an oversight role to ensure compliance with the bank's safeguards policies, review and provide clearance and approval for the RAPs. • Will carry out external supervision for satisfactory RAP implementation and provide support role throughout project implementation and monitor progress of project implementation. • Will recommend additional measures for strengthening institutional capacity building measures as appropriate and implementation performance.
2.	MoFA/ REWARD PCU	• Responsible for the successful implementation of the project by engaging appropriate contractors and consultants for the execution of the project. • Has the oversight responsibility for the implementation of the RAP. • Responsible for providing funds for the purchase of bicycles to eligible PAPs who will be economically displaced. • Responsible for honouring compensation to PAPs. • Have a representation in the RAP Management Teams including the Grievance Committee and the Monitoring and Evaluation Committee. • Responsible for ensuring that environmental and social safeguard issues and documentations are taken care of under all the Project.
3.	RAP Consultant	• Responsible for the preparation of the RAP and Communication and Outreach Plan. • Responsible for ensuring that impacts are properly assessed and all PAPs are identified and their affected assets recorded and valued for adequate compensation. • Responsible for ensuring that stakeholders including PAPs have been identified and engaged to ensure issues of concern to them are adequately addressed. • Responsible for consultations with the PAPs and providing feedback on project/RAP implementation to the PAPs and MoFA. • Responsible for ensuring that all grievances are resolved, and feedback provided to the PAPs concerned.

No.	Institution	Role/Responsibility Description
4.	Nandom Municipal Assembly	Beneficiary local government authority where the project is being implemented. Will be directly involved with the RAP implementation and will have representations in the Grievance Committee and Monitoring and Evaluation Committee.
5.	PAPs	The PAPs will be required to select representatives to the grievance committee at the Assembly/Sub-metro level. These representatives will be directly involved in activities of the Grievance Redress Mechanism (GRM) and serve as liaisons for all identified PAP groups.

6.2 Institutional Arrangement for the Payment of Compensation

The institutional arrangement for the payment of compensation identifies the institutions that will have the responsibility of making sure that PAPs are duly compensated before the commencement of the project. These institutions responsible for the payment compensation are listed in Table 6-2.

Table 6-2 : Institutional Arrangement for the Payment of Compensation

No.	Institution	Role/Responsibility
1.	AfDB	- Entity responsible for the release of project funds including funds for compensation payment to all identified PAPs. - Maintains an oversight role to ensure compliance with the bank's safeguards policies are followed in the payment of compensation. - Carry out external supervision for satisfactory compensation payment as general part of RAP implementation.
2.	MoFA/REWARD	- Institution responsible for payment of direct compensation to all identified PAPs as agreed without variations. - Carry out the compensation to PAPs in accordance with AfDB safeguard policies. - Have a representation in the Grievance Redress Committee to deal with issues relating to compensation to PAPs for satisfactory resolution.
3.	Nandom Municipal Assembly	- Provide support to MoFA/REWARD for overall RAP implementation including compensation to PAPs. - Will liaise with sub-metros and local Assembly members to contact PAPs for the payment of compensation. - Have a representation in the Grievance Redress Committee to deal with issues relating to compensation to PAPs for redress.

7.0 STAKEHOLDER ENGAGEMENT

Stakeholder participation during project planning, design and implementation is widely recognized as an integral part of resettlement planning process. As part of this study the relevant stakeholders were identified and consulted. This was meant to provide information relating to the activities of the proposed Project, create awareness and to elicit solutions for addressing concerns if any, and to integrate them into project design, operations and management.

7.1 Objectives of the Stakeholder Engagement

The Stakeholder Engagement has been a two-way flow of information and dialogue between project proponent and the stakeholders. It is specifically aimed at developing ideas that can help shape project design, resolve conflicts at an early stage, assist in implementing solutions and monitor ongoing activities. The specific objectives of the engagement are but no limited to;

- Provide information related to the activities of the proposed project;
- Facilitate and maintain dialogue;
- Seek participation of all interested parties;
- Identify key stakeholder interests as well as issues;
- Create solutions for addressing any concerns and integrating them into project design, operations, and management; and
- Enhance the project by learning from, and incorporating the expertise of individuals, professionals, communities and organizations.

7.2 Stakeholders Consulted

The preparation of the RAP was participatory involving various stakeholders including state and private local groups as well as affected persons and project communities. These are stakeholders that have an interest in the implementation of the project, including those positively and negatively affected. The stakeholders consulted were officials of the Municipal Department of Agriculture, Traditional Authorities (Ko and Kpee), Commercial Farmers (Ko and Kpee), Small Holder Farmers (Ko and Kpee), Womens group (Ko and Kpee), Mens group (Ko and Kpee), and Youth group (Ko and Kpee).

7.3 Consultation Process

The consultation process involved arranged meetings with stakeholders, site visits and community meetings. During the stakeholder consultations, the major issues raised by stakeholders included impact of the proposed project on livelihoods as well as compensation for Project Affected Persons (PAPs) whose farmland are within the project valley. Other concerns raised included project start date, and in-pup support for beneficiary rice farmers.

7.4 Summary of Outcome of the Stakeholder Engagement

Stakeholders engaged were generally in support of the project. Below is a summary of the issues discussed, concerns raised and recommendations.

Project implementation

- The project will be implemented in seven districts in the Northern, Savannah, North East, and Upper West Regions.
- Project implementation will have both beneficial (increase rice production and improve farmers livelihood) and adverse impacts (temporal impacts on livelihood, health and safety issues etc.) which must be noted and properly managed.
- Project activities (land development) should be undertaken in the dry season.
- Machinery for land preparation and rice processing should be provided.
- Extension education and training should be offered to all farmers on the project.
- Modern farming technology should be incorporated into the project design

Land Acquisition

- The project will not acquire land.
- The lands in the project area are owned by the traditional authority and are available for the project
- Land for the project is donated by community individuals in Ko and Kpee
- Alternative farmland for PAPs has been provided by the traditional authority.
- Land donation agreement forms have been signed between the project and the land donors.

Compensation

- Cut-off date communicated to PAPs beyond which compensation will not be paid in respect of encroachment on the project valley was 30th May, 2025.
- Compensation may arise depending on the nature of project impact
- Compensation may cover identified structures and economic displacement as may be determined.
- Compensation determination must be based on proper valuation rooted in fairness and honesty.
- Avenues to address compensation related concerns should be created for PAPs to engage.

Permitting and Environmental Concerns

- There is the need to obtain an EPA permit following the submission of an ESIA.
- The contractor must ensure that permitting conditions applicable during the construction phase are adhered to.
- There should be environmental consideration during project implementation.
- The use of agro-chemicals should be properly handled to prevent pollution/contamination

Community entry

- Contractor must ensure that the community leadership and traditional authorities are duly informed before commencement of construction activities.
- Engagement with traditional authorities and community people should be maintained throughout the construction phase as well as project life span.
- The contractor and other project officials should see the project communities as partners to engender collaboration for the successful implementation of the project.

Engagement and Sensitization

- Proper consultation with all beneficiary communities is necessary.
- Continuous engagement of the traditional authorities and the people on the project should be prioritized.
- The project is welcomed in the communities and should be implemented as planned.
- Community engagement should involve all groups and leaders including vulnerable persons.
- Engagement should also continue during the project implementation phase.

Road Improvement

- The roads linking the project valley area from the communities are in a bad state
- The roads if fixed will help to facilitate mobility of goods and persons.

Health and safety

- Vehicles and machinery commuting through communities to the valley should be community safety conscious.
- Illicit sexual encounters between the contractors' employees and young women/girls should be checked by project proponents and community leaders.
- Good environmental hygiene and waste management practices should be adopted at contractor camp sites.

Labour issues

- Project implementation should include vulnerable people.
- Interested community members especially the youth should be given employment opportunities during construction.
- Issues of child labour should not be encouraged especially during the operation phase of the project.
- Persons employed on the project should be given fair remuneration.

Grievance redress

- All project related grievances should be directed to the Grievance Committees for redress.
- Grievances should be addressed fairly and impartially.
- Project communities and PAPs should be engaged on grievance redress process.
- Redress of grievances reported should not overly be delayed.

Project Expectations

- Ready market for the rice produced to enhance the sustainability of the project.
- Agro-inputs and other supports should be extended to the farmers on the project.
- Project implementation should be non-discriminatory.
- Project must focus on employment creation and value addition

Details of the issues are presented in Annex 5 and pictures in Annex.

8.0 GRIEVANCE REDRESS

A Grievance Redress Mechanism (GRM) has been put in place to guarantee the efficient handling of complaints pertaining to the project's environmental and social (E&S) impacts. The main components of the GRM are outlined in this section.

The risk categorization of the project guides the development and scope of the GRM. Considering the moderate risk classification, the GRM has been structured to be commensurate, inclusive, and accessible for all impacted parties, especially vulnerable groups. The GRM will address grievances concerning land acquisition, environmental consequences, labour matters, community health and safety.

8.1 Objective

The objective of the Grievance Redress Mechanism (GRM) is to provide an effective, transparent and timely system that would give aggrieved persons' redress, minimize bad publicity, avoid/minimizes delays and avoid litigation in execution of the project. This ensures public health and safety, and sustainability of the project. The GRM will provide all affected stakeholders avenues through which they can express their concerns and receive the needed corrective actions in an appropriate and timely manner.

The GRM is guided by the following key objectives:

- To establish a mechanism that is proportionate to the potential risks and impacts of the project and is accessible and inclusive.
- To address concerns promptly, effectively, transparently, and in a manner that is culturally appropriate and readily accessible to all project-affected parties, at no cost and without retribution.
- To build trust among stakeholders and ensure that issues are addressed before they escalate into conflicts or litigation.
- To support project monitoring by capturing feedback and lessons learned from complaints.

8.2 Best International Practices

Consistent with best international practice and principles outlined in the African Development Bank's Integrated Safeguards System, the Grievance Redress Mechanism (GRM) is a key way to mitigate, manage, and resolve potential or realized negative impacts, as well as fulfil obligations under international human rights law and contribute to positive relations with communities and employees.

8.3 Nature/Type of Grievances

Issues which constitute grievances may be categorised into five. Community, group or individual dissatisfaction in any of these categories caused by or related to project activity implementation becomes grounds for lodging a complain These categories include;

- Environmental Issues
- Social Issues and Compensations
- Gender based Violence and Sexual Harassment/Exploitation
- Labour Issues and Workplace Violence
- Corruption and Fraud

Environmental issues

Refers to the matters that destroys, pollutes or degrades the existing state of the natural and build environment within the community as a result of direct/indirect projects interventions. Issues that would form the bases for complain in this category are;

- a. Unauthorised vegetation clearance
- b. Risk of water pollution
- c. Dust and particulate matter pollution
- d. Noise pollution
- e. Dumping of liquid and solid waste
- f. Construction waste accumulation on site or in the community
- g. Traffic diversion and congestions
- h. Traffic offences in community and construction sites (over speeding, careless driving/ operation of machinery in the presence of precautionary notices/signage, defective OHS notices/signage etc.)
- i. Situations that can cause loss of life and destruction of properties (use of explosive without permits, over speeding, careless driving, defective OHS notices/signage etc.)

Social Issues and Compensations

Subjects that fall under this category relates to any happening that has the potential to negatively affect the culture, norms, beliefs, values and or the sense of existence of an individual, group of people or the entire community. These issues could affect the social cohesion, communal living of the people and lead to soul touching grief, social unrests and conflicts. Issues that would form the bases for complain in this category are;

- a. Disregard for the culture, traditions and believes of the community/people
- b. Discrimination and the feeling of being discriminated against (access to information, compensation or project support)
- c. Disrespect for community elders, opinion leaders and the people in general
- d. Gap in consultation process/ improper consultation/ unintended mixing /skipping community hierarchy
- e. Claim about the scale of compensation
- f. Error in identification and allocation of compensation
- g. Land disputes (landlord and occupant, community members and occupant etc.)
- h. Accidents and incidents from construction sites that could harm life and property
- i. Existing social conflicts
- j. Labour unrest/disagreement between employee and workers (construction sites)
- k. Destruction of property (e.g. Agriculture land, produce etc.) during constructions etc.

Gender Based Violence, Sexual Harassment/Exploitation

The issues under this category relate to advance unsolicited sexual advances and the use of physical force on a person either from the community or hired labour. Specific issue that are grounds for complains under this category include;

- a. Unwelcomed sexual advances and sexual harassment (unwelcomed sexual gestures, signals, conversations, requesting for sexual favours in exchange for anything etc.)
- b. Attempting to or engaging in non-consensual sex with person of a legal age
- c. Attempting to or engaging consensual sex with an underage person
- d. Sexual violence

Labour Issues and Workplace Violence:

Refers to the matters that affects the welfare of workers at a construction site. Specific issues that are grounds for complains under this category include;

- a. Child labour
- b. Force labour
- c. Verbal, visual and physical abuse at the workplace

Corruption and Fraud

Issues under this category stem from the act or attempt to derive personal benefits from the discharge of project related activity or the deceive a person or system aimed at getting financial or personal gain. Specific issues that may provide grounds for lodging complains of this nature include;

- a. Seeking for personal benefits (monetary, in-kind items, other favours etc.) in official engagement
- b. Aiding or conniving to defraud or cheat a system or person
- c. Conflict of interest

8.4 Grievance Redress Structure

REWARD's proposed measures for resolution of grievances that may arise due to project implementation, is a three-tier grievance redress structure. These are;

- Community level structures (1st Tier) – These includes; a Grievance Redress Committee and Site-level Grievance Redress Mechanism.
- District level structure (2nd Tier) - District Grievance Redress Committee
- Project-wide level structure (3rd Tier) – Project Grievance Redress Committee

Community Level (1st Tier):

- Includes Community Grievance Redress Committees (GRCs) and site-level Grievance Redress Mechanisms (GRMs).
- Handles initial complaints from individuals or communities related to agricultural or infrastructure activities.
- Site-level GRMs are managed by contractors and report monthly to the project team; oversight is provided by Environmental and Social Safeguard Specialists.

District Level (2nd Tier):

- District Grievance Redress Committees (District GRCs) address unresolved complaints from the community level or cases where community GRCs fail to act within 30 days.
- They meet quarterly or as needed for urgent matters.

Project Level (3rd Tier):

- Project Grievance Redress Committee led by the Project Coordinator or Social Safeguard Specialist.
- Handles cases escalated from the district level, especially if not resolved in 30 days or if the complainant is dissatisfied with the resolution.

Each level functions progressively, allowing for escalation of unresolved or unsatisfactorily resolved issues. The composition of the Grievance Redress Committees/Structures at the various levels in the **Table 8-1** below.

Table 8-1: Composition of Grievance Redress Committees / Structures

Membership of Committees / Structures			
Community Grievance Redress Committee	Site-level Grievance Redress Mechanism	District Grievance Redress Committee	Project Grievance Redress Committee
Assembly member for the community	Site Environmental Officer	District Director of Agriculture /Rep	Project Coordinator
Chief	Representatives of site workers	District Planning Officer	Social Safeguard Specialist
AEA in charge of the community	PAP representative	District Land Officer	Environmental Safeguard Specialist
PAP representative		District Social Welfare Officer	Any other project Specialist who would be required

8.5 Tools for GRM

Tools and materials required for the operation and facilitating the grievance redress system are central to ensuring success. The tools which would be used in the management of the grievance redress system shall include;

1. Grievance Complaint Form:

- Primary tool for submitting complaints. A sample grievance complaint form is attached as **Annex 4a**.
- Available through local representatives (e.g., Assemblymen, Chiefs, Youth Leaders).
- Assistance provided for illiterate complainants.

2. Grievance Register:

- Logbooks distributed to all GRCs (community and district levels) to track grievance status and progress. A sample grievance register is attached as **Annex 4b**.
3. **Grievance Call Line:**
- A dedicated number managed by the Social Safeguard Specialist at the PIU.
 - Enables verbal and anonymous complaints, especially when GRCs are unavailable.

8.6 Grievance Redress Implementation Arrangement

The processes for addressing grievances/complaints shall include the following:

1. **Receiving Grievances (Within 3 Days):**
 - Involves submission, registration, and assessment of complaints.
 - Project staff are expected to be proactive in identifying potential issues.
 - Complaints can be submitted in-person, through calls, or by third parties (including anonymously).
 - Must be recorded in the grievance register and assessed promptly.
2. **Acknowledgement of Complaint (Within 7 Days):**
 - Formal response confirming receipt.
 - Mode of communication (written/email/phone) should consider complainant's literacy level.
3. **Resolution of Grievance (Within 14 Days):**
 - Assignment to appropriate redress structure.
 - Preparation and implementation of redress action, with updates to the complainant.
 - Continuous communication to ensure satisfaction and possible follow-up actions.
 - Resolution details must be recorded in the logbook.
4. **Closure of Grievance (Within 30 Days Total):**
 - Finalized when the complainant is satisfied and signs off with the GRC representative.
 - If unresolved, the process restarts or escalates to MoFA management, mediation, or court action.

Figure 8-1: Grievance Redress Procedure

Source: REAWRD, 2025.

8.7 Handling of Serious Grievances (GBV, Sexual Harassment, Corruption, Fraud)

Sexual harassment, violence, corruption and fraud are generally unacceptable in the Ghanaian Society.

These offenses are criminal under Ghanaian law (e.g., Constitution, Domestic Violence Act, EOCO Act) and state agencies including the Ghana Police Domestic Violence and Victims Support Unit (DOVVSU), Commission on Human Rights and administrative Justice (CHRAJ),

Economic and Organized Crime Unit (EOCO), the Office of the Special Prosecutor (OSP), and the Judiciary have legal authority to handle such cases. The project will therefore refer any such grievances to the appropriate state institution. Complainants may choose to report directly to state agencies if they prefer not to use the project's internal grievance system.

Additionally, measures to be instituted to prevent such occurrences include sensitization of persons associated with the project on these offences, and collaboration with Ghana Health Service to raise awareness on sexually transmitted diseases among workers and community members.

8.8 Roles and Responsibilities

The ultimate responsibility for implementation of this GRM lies with the Social Safeguard Specialist with close assistance from Environmental Safeguard Specialist as may be required from time to time. The responsibility of supervising activities of and its implementation rests with the Project Coordinator. Though the GRM is the ultimate responsibility for of the Social Safeguard Specialist, grievance management is largely a shared responsibility too. To this end, any other project officer who is required for the resolution of a complaint will be informed and called-up.

8.9 Cost of GRM Implementation

Resources for the implementation of the GRM will be fully provided by REWARD except in the instance where, the internal GRM procedures have been exhausted and complainant still feels dissatisfied and proceeds to the law court. In such instances, REWARD is not obliged to and will not provide resources in support of the dissatisfied person's pursuit of resolution in the law court.

Costs associated with the GRM implementation would include;

1. Cost of stationery: - Printing of grievance redress forms, grievance register/log book and grievance redress manual.
2. Activities of Grievance Redress Committee: - Transport allowance for committee members with the PAP representation inclusive, fuel for field visit by the committee, lunch for members during extended meeting hours.
3. Monitoring cost: - Fuel for the Social Safeguard Specialist and Environmental Specialist and Daily Subsistence Allowance (DSA).

The cost for the implementation of activities related to Grievance Redress Mechanism for the Ko and Kpee valleys (Nandom) project is contained in the RAP implementation budget as well as the budget for the implementation of the project's Environmental and Social Management Plan.

8.10 Advantages and Constraints of the GRM

The GRM, when well-functioning, not only improves project outcomes but also fosters community trust and reduces the risk of conflict. However, while the GRM offers several benefits, there are also practical challenges that can affect its performance and accessibility as summarized below.

Advantages:

- Promotes transparency, accountability, and the early resolution of conflicts.
- Provides a structured and accessible platform for stakeholder engagement.
- Encourages feedback that can be used to improve project design and implementation.
- Enhances trust, goodwill, and relationships with local communities and stakeholders.

Constraints:

- Potential reluctance to report grievances due to fear of retaliation or mistrust of the process.
- Capacity limitations at the local level, including lack of trained personnel, may delay resolution.
- Resource constraints, such as insufficient staffing or logistical support, can hinder effective implementation.

Language differences and cultural barriers may limit access for some community members.

8.11 Monitoring GRM Effectiveness

Regular monitoring of the effectiveness of the measures put in place is crucial for successful implementation of the grievance redress mechanism and for that matter, the RAP. Monitoring progress would be achieved through assessing two of the grievance redress tools (i.e. Grievance Redress Form and Grievance Register/log book.). These would be done through visits to communities and follow up calls to complainants to determine their level of satisfaction with the grievance resolution process.

9.0 MONITORING/ EVALUATION AND REPORTING

Regular monitoring and reporting are central to, and required for, effective management and implementation of the resettlement process. Resettlement monitoring and evaluation will focus mainly on the implementation of resettlement (i.e., compensation for economic displacement).

Monitoring aims to correct implementation methods during the course of the Project, as required, while evaluation is intended at checking whether policies have been complied with and providing lessons learnt for amending strategies and implementation in a longer-term perspective.

Monitoring and evaluation regarding progress of this project and RAP implementation is important to observe whether the mitigation measures planned are in fact implemented in order to make adjustments in project plans, and implementation if and where required. The purpose of monitoring is to ensure that approaches mentioned in this plan are well implemented to make the project successful.

The RAP monitoring will have two components, and these include:

- ♦ Process monitoring (internal); and
- ♦ Independent performance monitoring (external).

9.1 Process Monitoring (Internal)

The internal monitoring activities will focus on compliance with the Resettlement Action Plan (RAP) and the updated stakeholder engagement, communication and outreach plan and to ensure that the objectives of these reports have been achieved.

9.1.1 Purpose and Responsibility

The internal process monitoring will be carried out by the RAP Consultant during the RAP/project implementation phase on behalf of MoFA to track implementation activities, and be able to propose corrective measures expeditiously.

In addition to the above, the RAP Consultant will

- Ensure compliance with the principles of the RAP and that actions and commitments described in this RAP are being implemented;
- Ensure that eligible people to be affected by the project receive their compensation promptly.
- Ensure that complaints and grievances lodged by PAPs are followed-up and resolved;
- Ensure that the contractors do not destroy properties beyond or above what has been compensated for or valued for compensation;
- Provide MoFA with feedback on the resettlement/compensation implementation programme.

9.1.2 Monitoring Indicators for RAP Implementation

The monitoring indicators will include but not limited to:

- Number of PAPs available and received or signed for the compensation;
- Number of Representatives of PAPs who received compensation on behalf of PAPs;

- Date of compensation presentation, and recipient of the compensations;
- Number of grievances registered, number of grievances resolved and unresolved complaints; and
- Number of complaints resolved at the project site level, resolved by MoFA, resolved by the Grievance Committee, and number sent to the law courts.

9.1.3 Monitoring of the Stakeholder Engagement, Communication and Outreach Plan

The process of monitoring the stakeholder engagement programme will aim to provide information such as whether:

- The activity is achieving the desired goals.
- The implementation is progressing towards the expected results.
- Complaints being received is due to lack of or inadequate project information dissemination or spread of inaccurate information or misinformation
- The time frame is respected.

9.1.4 Reporting

The RAP Consultant will prepare and submit the following reports to MoFA/REWARD:

- Monthly Reports during construction – to provide account for all activities carried out within the specified month including challenges encountered. The monthly reports will provide MoFA/REWARD and other relevant stakeholders with information on RAP implementation and issues of fresh compensation if any and grievances.
- Quarterly Progress Report during construction– to provide status of all activities carried out in the specified quarter including challenges and recommendations. The quarterly reports will enable MoFA, and other relevant stakeholders to verify that resettlement measures including compensations identified in the RAP were implemented and that construction and reinstatement works as well as actions prescribed in the RAP and contractor work schedules are being implemented.
- RAP Closeout Report – to provide a close out report on all resettlement and community engagement planning and implementation activities among others as provided in the ToR.

9.2 Independent Performance Monitoring (External)

An independent performance monitoring will be carried out by an external party (e.g., AfDB) at structured intervals, e.g., mid-term monitoring and completion evaluation/audit. The completion evaluation/ audit is to determine whether the objectives of the RAP have been achieved or otherwise and that compensation has been successfully completed in compliance with the RAP. The completion evaluation/ audit should be undertaken after completion of construction activities including reinstatement works if any and submission of closeout report by the RAP consultant.

10.0 IMPLEMENTATION PLAN

The implementation plan provides for indicative timelines for implementation of the RAP. The Table 10-1 below shows the general implementation plan for the various tasks identified under the resettlement related programme. The Implementation Plan will be updated periodically as and when changes occur in project/RAP implementation timelines.

Table 10-1: RAP Implementation Plan

Main tasks	Specific tasks	Timelines/ Period	Comments
Stakeholder engagement	Meetings with stakeholders i.e. one-on-one, key informant interviews, focus group discussions	April to May 2025	Completed
Preparation of draft RAP	Census of affected persons	April to May 2025	Completed but monitoring required
	Socio-economic survey of PAPs	April to June 2025	Completed but monitoring required
	Field assessment of impact categories and reporting	June to July 2025	Completed
	Writing of draft RAP report in line with the ToR for the assignment	August 2025	Completed
Revision and Finalization of draft Report	Review of draft RAP	September 2025	-
	Revised RAP preparation	September 2025	-
	Finalization of RAP	September 2025	-
	Approval and clearance of RAP	October 2025	-
Disclosure of Report	Disclose RAP at Nandom Municipal Assembly and on AfDB website	November 2025	-
	Disclosure of compensation proposal/ figures to PAPs	November 2025	-
Formation of Grievance Committee	Grievance Committee	December 2025	
Compensation payment	Compensation disbursement to PAPs	January 2026	To be paid prior to commencement of project activity
Grievance Redress	Resolution of all disputes/ complaints	Project duration	-
Internal Monitoring and Evaluation	Monitor implementation of resettlement/ compensation activities	Project duration.	-
Reporting	Prepare Quarterly Progress Report	Every quarter during construction period	-

Main tasks	Specific tasks	Timelines/ Period	Comments
	Prepare RAP Closeout Report before commencement of works	One (1) month before construction phase activities commence	-

11.0 COST AND BUDGET

11.1 Estimated Cost for RAP Implementation

The cost estimates for the implementation of the RAP including direct compensation payments in the form of bicycle to PAPs, and contingency issues is **Gh¢ 104,770.00 (USD 9,940.23)**. The details are presented in the Table 11-1 below.

Table 11-1: Estimated cost for the implementation of the RAP

No.	Item	Estimated Cost/ Gh¢ / USD	Remarks	Source of funds
1	Compensation to PAPs (Bicycles)	50,700.00	Amount to purchase bicycles for PAPs to facilitate transportation to alternative farming area. To be provided and bicycles purchased by MoFA	Project funds
2	Subtotal	50,700.00 USD 4,810.25		
3	Audit of RAP completion	10,000.00	Evaluation of RAP implementation	Project funds
4	Cost for complaints redress	31,000.00	Cost of grievance redress	Project funds
5	Information and awareness campaign	8,0000	Required for publicity and awareness creation including disclosure	Project funds
6	Subtotal	49,000.00 USD 4,648.96		
7	Contingency (10% of No.2)	5,070.00	For unforeseen contingencies and incidental costs. To be provided by MoFA	Project funds
8	Total for RAP Implementation	104,770.00 USD 9,940.23	Estimated cost for the implementation of the RAP for Ko and Kpee Rice Valleys	Project funds

12.0 CONCLUSION

This RAP covers 39 persons including 38 males and 1 female whose primary livelihood activity of crop farming on the project site will be affected by the REWARD project implementation by way of livelihood disruption and economic displacement.

Compensation will be provided in the form of bicycles, to be purchased from project funds to the project affected persons from an estimated budget (**Gh¢104,770.00 / USD 9,940.23**) to facilitate transportation of PAPs to the alternative land allocated for farming by the Chiefs which is about 3-6 km away from the project communities.

Also, concerns of PAPs, community members or any other persons will be adequately addressed by the Grievance Redress Mechanism proposed in this report. Sufficient provisions have been made for PAPs to receive their compensation and any necessary assistance.

Annex 5: Record of meetings in Nandom Municipal

Stakeholder/ Institution/ Location	Contact Person(s)	Role(s)	Contact No.	Date	Summary of Information Received and Recommendations
Municipal Department of Agric Nandom	Abaching Esther Gaeten Baligi Issah Salifu	Coordinating Director Director of Agriculture, Plant protection & regulatory service	0541109393 0243845050 0559636688	2025-04-15 10:00AM	Compensation • If there are indications that there will be PAPs in the valley, they must be captured for the payment of appropriate compensation after valuation. • Possible compensation must cover structures and economic displacement as may be determined. • Compensation for land may arise if that is the requirement of the project. • Compensation must be based on proper valuation. Project Implementation • Crops grown are maize, sorghum, rice, beans, groundnut, millet, yam and soya. • The municipality is dominated by agricultural production activities. • The project should incorporate climate issues in the implementation. • Project activities (land development) should be timely before rains. • A refresher training needed on rice production for the people • More communities should be enrolled on the project. communities. • The project will improve food security/livelihood, boost farmer income, improve rice value chain, increase rice yields, enhance farm income, and create jobs. • Irrigation development should be part of the project component to sustain the project. • Lands are mostly stool owned. • Logistics (motor), funds (fuel), and inadequate staff are some of the challenges faced by the department. Recommendations • Agro-inputs from government will be required to boost the project.

					Machinery for land preparation and processing should be provided.
Commercial Farmers Nandom-Kpee	Slyvester Aasom	Farm manager	0552106284	2025-04-15 4:00PM	Project Implementation - The project will boost commercial agriculture production in the area. - Ready market for the rice produced will determine the sustainability of the project. - The project will enhance livelihood and improve household incomes. - The project can increase rice production volumes when implemented well. - Proper consultation with all beneficiary communities is necessary. Recommendations - Extension services should be extended to the farmers. - Irrigation should be key in the project implementation.
Women Nandom (Ko)	Beyuo Cecilia Cordilia Kobe Kele Jane Canteen Kilien Evelyn Aa-Are Felicia Kelle Naamwen-Elie Ophelia Magdaline Yiribeyour Comfort Dabuo, Francisca Tuopare	Farmers	0249497912 0551006551 0551548400 0547399209 0597919412 0257715463 0530885405 0555544223 0596736376	2025-04-19 2:00PM	Project Implementation - Support should be given to farmers to get inputs for the farming activities. - Water for dry season farming should be part of the project. - The project can improve income and livelihood of women if properly involved in the project. - The project could enhance food security when it comes to rice production in the region. - There women association that the project can provide support to undertake rice production. - Access to financial services to farmers should be facilitated to boost production. Recommendations - The road network in the area is bad and should be attended to. - Support to beneficiary and women especially will be key to the success for the project.
Small Holder Farmers	Flavenu Be-iire, Gregory Mwenderi,	Farmers	0547490045 0245334860 0546872290 0540657631	2025-04-17 11:00AM	Project Implementation - The project is a welcome development for farmers generally in the area. - Marketing of farm produce is a challenge which the project must intervene to resolve.

Nandom (Ko)	Joseph Dery, Francis Dery, Titus Sinkang, Barely Siekang, Tangsegtaa Mary, Kale Elizabeth, Callistus Tengang		0557587693 0559713922		- The project will improve income and livelihoods in the area. - Irrigation should be considered for the project to make farming sustainable. - Pest and disease control should be planned for the project. - Extension education and training should be offered to all farmers on the project. - Agriculture mechanization should be part of the project. - Improved seeds should be provided to farmer for cultivation. Recommendations - Modern farming technology should be incorporated into the project design. - Agriculture infrastructure should be provided as part of the project.
Small Holder Farmers Nandom-Kpee	Yiryang Thomas Bulmour Dominic Guo Martin Kuubertery Poukang Aayel Reginald Lambol Robert, Kalle Gregory Kaale Kennedy Kog Callistus Tamseb-Teb Anthony	Farmers Elder, Sub Chief Community Member Farmers	0554423670 0594787798 0207881330 0595068894 0554518110 0543300623 0595739839 0249889575	2025-04-17 9:0AM	Project Implementation - The project will increase production, income levels. - All farmer groups interested in the project should be considered. - Marketing and processing of produce should be well planned before harvesting. - Pest and disease control should be planned for the project. - Extension education and training should be offered to all interested farmers on the project. Recommendations - Support farmers with mechanization service, inputs - The roads in the area should be improved.
Traditional Authorities Nandom Kpee	Naawere Begel yen, Joseph Kuuvenibe, Dery Julia, Kundobuo	Chief Elders	0535210485 0531384637 0551472867	2025-04-17 1:00PM	Project Implementation - The lands in the project area are owned by the traditional authority and are available for the project. - The people are predominantly farmers and will be greatly involved in the project. - Irrigation for dry season farming should be part of the project.

	Tagchuni, Bangfor Tadoor, Nyunyni Walieri				• Support for farmers should be consistent and timely. • Conflicts are not major issues in the area. • The project will help the youth and improve incomes and livelihoods. • Agro-inputs and other supports should be extended to the farmers. Recommendations • Continuous engagement of the traditional authorities and the people on the project should be prioritized. • The road network is poor and should be improved. • Project implementation should be non-discriminatory.
Traditional Authorities Nandom (Ko)	Naa Thomas Domepeeh Gyereh Gregory Beyuo Aalangdong Prosper Dapilah Peter Aayel Cornelius	Chief of Ko Elders	0551470720 0554040162 0245417621 0551468707 0543299297	2025-04-17 4:00PM	Compensation • Compensation may arise depending on the nature of project impact and agreement arrived at with the proponent. • If people are found to be dependent on the earmarked land, some assistance must be extended to them. • Valuation must be conducted for properties identified fairly and honestly. Project Implementation • The project is laudable and will be important for the people. • Farming is prominent in the area and must be supported. • The lands in the project area are owned by the traditional authority and are available for the cultivation of rice as the project intend. • Irrigation for dry season farming should be part of the project as the dry season makes the people redundant. • Support for farmers should be consistent and timeous. • The project will help the communities and improve incomes and livelihoods. • Agro-inputs and other supports should be extended to the farmers. • Mechanization centers for the farmers should be set up to support land preparation. • Marketing and processing should be well planned and coordinated. Recommendations • The traditional authorities should always be consulted on the project especially in respect of land acquisition.

					Project implementation should be non-discriminatory and non-political.
Youth Nandom (Ko)	Andrews Dery Martin Billey Vitus Yirwille Clement Kyorku Vitus Dabuo Baawuo Oswald Christopher Kpime Theresa Kuuper Esther Dabuo Mercy Zinale	Farmer Organizer Chairman Member Women's organizer	0537443843 0530721680 0240206804 0241126217 0555426306 0240087845 0546259421 0594842064 0256992112 0595570577	2025-04-17 10:00AM	Project Implementation - The project will help the youth in the farming business. - Support should be extended to the in the form of inputs - Agriculture mechanization should be set up as part of the project to support land preparation. - The project will help to manage the increasing migration of the youth down south. - Irrigation for dry season farming should be integral in the project implementation. - Training on modern agronomic practices should be offered to the youth to engage well in the farming activities. - The project will help to curb unemployment among the youth in the communities. Recommendations - The selection of beneficiaries should be apolitical. - Attention should be given to the provision of input support as the youth do not have the resources to buy inputs. - Extension education and training should be part of the project - Processing and marketing issues should be resolved by the project before implementation.
Youth Nandom Kpee	Haruna Basit Issahaku Muniru	Youth leaders	0241299383 0204412799	2025-04-18 10:00AM	Project Implementation - Attention should be given to the provision of input support as the youth do not have the resources to buy farm inputs. - Extension education and training to the youth should be part of the project - Processing and marketing issues should be resolved by the project before commencement. - The project will help the youth in income generation. - Support should be extended to the in the form of inputs and tools. - Agriculture mechanization should be set up as part of the project to support land preparation. - The project will help to manage the increasing migration of the youth down

					south. • Irrigation for dry season farming should be integral in the project implementation. • Training on modern agronomic practices should be offered to the youth to engage well in the farming activities. • The project will help to curb unemployment among the youth in the communities. Recommendations • Further Community sensitization on the project is needed. • The selection of beneficiaries should be non-partisan. • The road network to facilitate easy movement is bad in the area and should be improved.
Men Nandom (Ko)	Daata Robert Lanbol Albert Naabieka Inatious Kulem Amasuou Aayel Reginald Kalle Gregory Kog Callistus	Head Man Community Member Animator Elder Sub Chief Community Member	0554906616 0534457929 0256818448 0595068894 0554518110 0595739839	2025-04-17 12:00PM	Project Implementation • The project will improve food security in the region and its laudable. • The project should provide the necessary support to men and other interested persons to undertake the rice production. • Irrigation facility to help in dry season farming should be incorporated in the project. • Farm inputs and machinery for land preparation should be extended to all beneficiaries. • Those who are already farming at the site should be compensated. • Access routes to the project site should be worked on. • Farmer support centers should be set up to help in land preparation. • The project has the potential to improve livelihood for men and enhance incomes. Recommendations • Government support for this project should be offered timeously • Processing and marketing of rice should be vigorously pursued. • All the necessary support that needs to be provided by the project proponent should be available.

Men Nandom Kpee	Kuunibe Joseph Mwinyang Dominic Bangfo Kuubio Kuunibe Peter Aratuo Festus Begarebogr Raymond Yiryang Thomas Saabnuu Der Bangfo Francis	Member Men Organizer	0248320309 0245129491 0551973290 0247737946 0248585376 0256897464 0554423670 0505423553 0541912158	2025-04-17 2:00PM	Project Implementation • Men have easy access to land and can fully participate in the project. • The men are mostly farmers and support the project. • The project could help improve food security in the area and the region. • The project should provide the necessary production incentives to encourage more men to be involved. • Agro-inputs and machinery for land preparation should be provided by the project. • Irrigation facility to help in dry season farming should be incorporated in the project. • Those who are already farming at the site should be compensated. • Access road to the project site should be worked on. • Farmer support centers should be set up to help in land preparation. • The project should be open to all persons in the area including the youth and women. Recommendations • Government and NGOs should fully support the project. • Processing and marketing of rice should be vigorously pursued. • The roads should be improved in the area for easy mobility.
Women Nandom Kpee	Sombuor Eunice Nifaakang Gladys Aapuobe Grace Eru Tieruwel Zaba Alice Naawerebagr Emila	Farmers	0548159811 0593444356 0596150770 0541912158	2025-04-18 3:00PM	Project Implementation • There are women groups in farming that can be supported to engage in the project implementation. • The women support the project as it will boost income and livelihood if implemented effectively. • Support should be extended to women in terms of agro-input provision. • Land preparation support should be given to the beneficiaries. • Irrigation as a component of the project should seriously be considered. • The selection of women to partake in the project should be fair. • Adequate training should be provided to all farmers to be placed on the project. • Extension services by the Agric department should be effectively undertaken.

					- Improved seedlings should be the choice for the project to enhance crop yield. Recommendations - Processing and marketing to guarantee prices should be led by the project proponent. - All necessary support to make the project a success should not be withheld from the farmers. - Infrastructure for the project should fully be provided to make the project sustainable.

Vulnerability Criteria Key:

- **V1: Low Income:** PAP's annual income is GHS 2,000.00 or less.
- **V2: Female Headed Household:** PAP is the female Head of the household.
- **V3: Large Household Size:** Household has 10 or more members.
- **V4: Physical Disability:** PAP has a physical disability.
- **V5: Old Age:** PAP is 70 years of age or older.

Annex 9: Land Donation Agreement Form

Voluntary Land Donation Form (VLD)

A-1. Outline of the Minutes of informed consent for the donation of land by an individual or Chief

I, the undersigned, Mr./Mrs./Chief Sagrazza Solomon, acknowledge having donated land with an area of Two hectares with geographic coordinates Nandom located in the Village of Brutu, District of Nandom Municipality of Nandom and Region of Ukara, to be used for the development of Dry Season Gardens as part of the Project SLP financed by the African Development Bank (AfDB) in the Republic of Ghana.

I voluntarily transfer this land/building free of charge with full knowledge of the facts, without any constraint or under any threat, and after having been duly informed in advance that I am entitled to fair compensation prior to any expropriation for reasons of public utility.

It is of my own free will and with the consent of my beneficiaries, dependents (wife/husband, children, brothers, sisters, etc.) that I make this donation. Consequently, I definitively renounce my right of ownership and those of my beneficiaries and dependents on this land until it is no longer used for the agreed purpose.

I confirm that the donation does not affect my livelihood or that of my beneficiaries and dependents, in the immediate or medium or long term.

I have decided in all lucidity to transfer the said land for the benefit of the Brutu community to be used exclusively for the realization of the infrastructure mentioned above¹. Thus, the land donated may not under any circumstances be used for other purposes, nor transferred, nor reassigned. Consequently, this donation becomes null and void, if the purpose for which the donation is made does not materialize within the framework of the project concerned.

In faith whereof, this present report is made and signed to serve and be valid for all rights.

Date: 23 May, 2025

Name of Land Owner Sagrazza Solomon

Signature of Land owner [Signature]

The witnesses²

1. Name and Signature: Segkpeb Chrisatus [Signature]

2. Name and Signature: Abeikpeng Michael [Signature]

The Beneficiary (Community Representative)

Name and Signature Abeikpeng Thaddeus [Fingerprint]

¹ Upon completion of the installation of the infrastructure/investment the land shall be registered/titled on the name of the beneficiary community/locality.

² Each witness must be of legal age, in full possession of his or her faculties and civil rights and be a beneficiary of the donor.

Annex 11: PAPs Consent Form

Individual negotiation/consent form, between the Project Affected People (PAP) and the Borrower/Developer

Republic of

GHANA

A. Basic data

Project name: RESILIENT RICE REGIONAL VALUE CHAINS IN WEST AFRICA (REWARD) PROJECT

- Sub-project/activity that triggers the resettlement: Economic displacement
- Location of the affected asset (village, municipality, district, region): NABANT - DABANGTENG
- Site or Corridor where the affected asset is/are installed: BAKU - KAA

B. Identity of the Project Affected Person (PAP)

- PAP's code: KPE0002
- Name & Surnames: MABORRUM TOBRED
- Age: 40
- Sex: MALE
- Representative of Household or minor? ☐ if ticked, provide signed /authorization to represent.
- Physical address: MABORRUM House
- Tel: 0541349490
- Nature & ID no.: GHA-722675760-6
- Signature or Thumbprint of PAP: 

C. Nature/type and replacement cost of the affected asset

<i>No.</i>	<i>Nature of affected asset</i>	<i>Characteristics/Quantity/Size of the affected asset</i>	<i>Tick</i>	<i>Nominal value (\$)</i>	<i>Agreed compensation. (Amount in real value &/or in-kind)</i>
	Land		☐		
	Built land		☐		
	Residential building (primary residence)		☐		
	Building in rent		☐		
	Shop		☐		
	Hangar		☐		
	Fence		☐		
	Grave/graveyard		☐		
	Sacred/worship site		☐		
	Fallow		☐		
	Livestock farm		☐		
	Fishponds		☐		
	Plantations		☐		
	Crops		☐		
	Income-generating activities other than agriculture		☐		
Total real amount due to the PAP (including in-kind compensation)					

D. Nature of the assistance provided to the PAP

<i>No.</i>	<i>Nature of the assistance</i>	<i>Tick</i>	<i>Nominal value (\$)</i>	<i>Agreed compensation (Amount in real value &/or in-kind)</i>
1	Temporary rent	☐		
2	Moving expenses	☐		
3	Capacity building	☐		
4	Vocational training	☐		
5	In-kind subsidy/inputs	☐		
6	Transportation Assistance	v	USD 123.38	Donation of Busanga Bicycle with a carrier
X	Other (specify)	☐		
Total real amount due to the PAP (including in-kind compensation)				USD 123.38

Individual negotiation/consent form, between the Project Affected People (PAP) and the Borrower/Developer

Republic of

GHANA

A. Basic data

Project name: RESILIENT RICE REGIONAL VALUE CHAINS IN WEST AFRICA (REWARD) PROJECT

Sub-project/activity that triggers the resettlement: Economic displacement

Location of the affected asset (village, municipality, district, region): NIAWOM-BONDOMIETENI

Site or Corridor where the affected asset is/are installed: BATAWU BOA

B. Identity of the Project Affected Person (PAP)

PAP's code:

KPE0003

Name & Surnames:

DELLA FABIANI

Age:

48

Sex:

MALE

Representative of Household or minor? ☐ if ticked, provide signed /authorization to represent.

Physical address:

NIAWOM-BONDOMIETENI

Tel:
